**ACTION:** Make a Motiuon to Approve

**STAFF RECOMMENDATION:** Staff recommends approval of the Planning Commission meeting Minutes.

**NARRATIVE:** The minutes of the July 19, 2016 meeting are attached.

## PLANNING COMMISSION MEETING MINUTES

Tuesday, July 19 2016 @ 7:00 p.m.

**Members Present:** Mark Yates, Craig Stephan, Sherri Neff, Lew Kasselmann, Merle Parks, Lloyd Mesmer and Dave Pierce

**Members Absent:** Jason Krone

**Staff Present:** Don Slone, AICP, CFM, Planning Director – Floodplain Manager

Chairman Parks called the meeting to order at 7:00 p.m. and asked for a roll call. Roll call listed above.

Chairman Parks introduced **Item No. 1: Approval of Minutes** and called for a motion to approve the minutes of the June 14, 2016 Planning Commission meeting. Commissioner Pierce made a motion to approve the minutes as written with a second from Commissioner Stephan. Chairman Parks asked if there were any questions or comments about the minutes. Seeing none, he called for the vote. The minutes were approved by unanimous vote.

### **New Business:**

Chairman Parks introduced **Item No. 2: Special Use Permit: SUP-135: “Rose Palms Support Services”**, for an adult day care center. Requested by Michael Brooks, Rose Palms Support Services, LLC, under lease from Buehler Ventures, LLC, property owners of record. The property is located at 134 N. 130<sup>th</sup> Street, Suite C, zoned C-2, General Business District.

Chairman Parks opened the public hearing at 7:02 p.m. and asked for Staff Presentation. The Planning Director presented the case with a Staff Recommendation to approve the Special Use Permit subject to the six (6) conditions listed in the Staff Report. The Planning Director then stated that he received a call from Ms. Joan Baumann who owns the property across the street at 13010 Riverview Avenue who stated that she had “no objections” to the proposed special use permit for the adult day care center.

Chairman Parks asked if the applicant would like to address the Planning Commission. **Michael Brooks, Rose Palms Support Services, LLC** stated that he wanted to expand the adult day care center from his current location and found this new location in Bonner Springs to be a great fit for his business. He then stated that he has owned the business with his wife for the past 17 years.

Commissioner Stephan asked why he was relocating at this time. Mr. Brooks stated the current location on Parallel Avenue had changed over the years and has now become very busy and was not conducive to his clients or staff.

Commissioner Parks asked if they were licensed with the State of Kansas. Mr. Brooks stated that they are currently licensed by the State but received all their client referrals for service from Wyandotte County.

Commissioner Pierce asked what type of services they provide. Mr. Brooks stated that they provide “life skills” to their clients.

Commissioner Stephan asked if all his clients are ambulatory. Mr. Brooks stated that they are all ambulatory.

Commissioner Kasselmann asked what the age group of his clients is. Mr. Brooks stated the age group is generally 18-65 but does have a couple clients that were 67 and 68 years old respectively.

Commissioner Parks then asked Mr. Brooks if he was in agreement with the six (6) listed conditions. Mr. Brooks stated that he was in agreement.

Chairman Parks asked if anyone else in the audience had any further questions or comments. Seeing none he closed the public hearing at 7:10 p.m. and asked for a motion. Commissioner Stephan made a motion to approve the special use permit with the six (6) listed conditions with a second from Commissioner Mesmer.

Chairman Parks asked if there were any additional questions from the Planning Commission. Seeing none he called for the vote. Motion passed 7-0.

The Planning Director stated that he will forward this item to the Governing Body on August 8, 2016 with a Planning Commission recommendation of approval.

Chairman Parks introduced **Item No. 3: Lot Split: LS-120: "Bonner Springs Bus Barn"** Requested by Larry Hahn, LS, Hahn Surveying for Dan Brungardt, Superintendent, U.S.D. 204 under contract with Jim Bishop, Vesta Lee Lumber Company, property owner of record. The property is located at 2300 S. 138<sup>th</sup> Street (Vesta Lee Lumber Co.), zoned I-1, Light Industrial District.

Chairman Parks stated that he has a conflict with this item and will remove himself for any discussion as he provides legal services to U.S.D. 204. Vice-Chairman Pierce then stated that he also has a conflict and will remove himself from any discussion as he is a current member of Board of Education for U.S.D. 204.

The Planning Director, in his capacity as the elected Secretary, introduced the item and gave the Staff Presentation. The Planning Director presented the case with a Staff Recommendation of approval with the conditions listed in the Staff Report.

The Secretary introduced the applicant, **Larry Hahn, Hahn Surveying** and asked if he would like to address the Planning Commission. Mr. Hahn stated that he had nothing to add and has no objections to any of the listed conditions.

The Secretary asked if anyone in the audience had any questions or comments. Seeing none, he asked for a motion. Commissioner Stephan made a motion to approve the Lot split with five (5) listed conditions with a second from Commissioner Neff.

The Secretary asked if there were any questions from the Planning Commission. Seeing none he called for the vote. Motion passed 5-0.

The Secretary turned the meeting back to Chairman Parks who asked if there was any further business. Seeing none, he adjourned the meeting at 7:18 p.m.

**ACTION:** Make a motion to approve.

**STAFF RECOMMENDATION:** Staff recommends approval of this item as listed in the Staff Report.

**NARRATIVE:** A Staff Report is included in the agenda. Staff will be present to answer any questions. **This item will be forwarded to the Governing Body on September 12, 2016.**

To: Planning Commission  
From: Don E. Slone, AICP, CFM, Planning Director  
RE: "K-32 Tri-City Multimodal Redevelopment Plan"

**Recommendation:**

The Stakeholder Advisory Committee and the Technical Advisory Committee both recommend approval of the K-32 Tri-City Multimodal Redevelopment Plan as presented to guide the future long term transportation and redevelopment vision for the K-32 Corridor. The K-32 Corridor stretches from the westernmost limits of Bonner Springs through Edwardsville east to N. 57<sup>th</sup> Street in Kansas City, Kansas. This "Plan" was prepared by Vireo with assistance from Olsson Associates and Gould Evans for the Mid-America Regional Council, Kansas Department of Transportation, Unified Government of Wyandotte County-KCKS, and the cities of Bonner Springs and Edwardsville.

The Planning Director recommends the K-32 Tri-City Multimodal Redevelopment Plan be adopted by "Reference" as an "Addendum" to the Comprehensive Plan "Vision 2025" in view of the fact the "Plan" encompasses the cities of Bonner Springs, Edwardsville, and Kansas City, Kansas, and to forward that recommendation to the Governing Body to adopt the "Plan" as drafted.

**Exhibits:**

K-32 Tri-City Multimodal Redevelopment Plan Acknowledgements – Stakeholder Advisory Committee and Technical Advisory Committee Listing, K-32 Corridor Study Timeline amended July 21, 2016; Proof of Publication and the "Final Draft" of the K-32 Tri-City Multimodal Redevelopment.

**Discussion:**

The K-32 Tri-City Multimodal Redevelopment Plan kick-off meeting was held in Bonner Springs on September 29, 2015 followed by four (4) Advisory Committee meetings and four (4) Public Meetings in Bonner Springs and Edwardsville as well as four (4) Public Meetings in Kansas City, Kansas.

The following are the events as they occurred for the "Plan" as presented:

1. Project Team Kick-Off Meeting – September 29, 2015
2. Advisory Committee Meeting #1 – October 28, 2015
3. First Public Meeting – November 19, 2015
4. ~~Advisory Committee Meeting #2 – January 21, 2016 (Cancelled Weather)~~
5. Second Public Meeting – January 27, 2016
6. Technical Advisory Committee Meeting – February 25, 2016
7. Advisory Committee Meeting #3 – March 10, 2016
8. Third Public Meeting – March 31, 2016
9. Stakeholder Advisory and Technical Advisory Committee Meeting – April 19, 2016
10. Joint City Council / Planning Commission Workshop – May 9, 2016
11. Advisory Committee Meeting #4 – June 8, 2016
12. Fourth Public Meeting – June 30, 2016
13. The "Plan" placed on the Planning Department's webpage – July 21, 2016
14. Public Hearing by the Planning Commission to consider the adoption of the "Plan" – August 16, 2016
15. Consideration for the approval and adoption of the "Plan" by the Governing Body – September 12, 2016

**Note:** The K-32 Corridor Study Timeline is attached that reflects all meetings scheduled for all three cities.

**PROOF OF PUBLICATION**

**NOTICE**

**NOTICE OF PUBLIC HEARING  
PLANNING COMMISSION  
CITY OF BONNER SPRINGS, KANSAS**

The Planning Commission will hold a public hearing on Tuesday, August 16, 2016 at 7:00 p.m. at City Hall in the Council Chambers, 205 E. 2nd Street, Bonner Springs, Kansas. The purpose of the public hearing is to receive public comment for:

Comprehensive Plan Addendum: "K-32 Tri-City Multimodal Redevelopment Plan". A request by the Bonner Springs Planning Department to consider the adoption of the "K-32 Tri-City Multimodal Redevelopment Plan" as an addendum to the City's Comprehensive Plan "Vision 2025" to guide future development within the K-32 Corridor Planning Area. The "K-32 Tri-City Multimodal Redevelopment Plan" was prepared by Vireo with assistance from Olsson Associates and Gould Evans.

The "Draft" of the K-32 Tri-City Multimodal Redevelopment Plan may be viewed online at [www.bonnerrsprings.org/planning](http://www.bonnerrsprings.org/planning), click "K-32 Tri-City Multimodal Redevelopment Plan".

Questions or comments may be addressed to Don E. Slone, AICP, CFM, Planning Director at (913) 667-1708 or by email to [dslone@bonnerrsprings.org](mailto:dslone@bonnerrsprings.org).

Persons who wish to be heard will be given an opportunity to make comments at the public hearing.

# Executive Summary

## Vision

The vision for the corridor is to:

*“create a regional destination characterized by green industries and business parks, attractive development, strong downtowns, and recreational areas set within a scenic and friendly environment that is accessible to residents and visitors by walking, biking, riding transit, and/or driving.”*

## Community Engagement

Twenty-five stakeholder and community meetings were coordinated during the planning process. The meetings and a series of opinion polls helped community members identify key corridor challenges, opportunities, and potential focus areas. They also discussed converting K-32 into a parkway. In community members' opinions:

- Park and recreational amenities are top opportunities
- Transportation options for transit riders, cyclists, and/or pedestrians are the biggest challenge
- Downtowns should be the highest priority focus areas for redevelopment activities
- Landscaping and lighting are the most important features to include if K-32 became a parkway
- K-32 could be renamed "Kaw Valley Parkway" or something similar

## Recommendations

Community ideas plus additional research and analysis framed the types of recommendations that are included in the *K-32 Tri-City Multimodal Redevelopment Plan*, including those for:

- Redevelopment
- Parks and greenways
- Transportation
- Infrastructure
- Place-making
- Environmental considerations
- Financing improvements

Top priority recommendations involve:

- Encouraging the continued development of the K-32 corridor as an employment center that draws workers from beyond the planning area to train for and obtain jobs at K-32's green industries and business parks
- Targeting redevelopment activities to top priority activity centers, including K-32 in Historic Downtown Bonner Springs, near K-7, 4th Street, 78th Street, and the 65th Street/Turner Diagonal areas
- Conducting a traffic study to forecast future traffic demand (vehicle, bicycle, pedestrian, and transit) and the corresponding number of travel lanes, bike/pedestrian facility types, ideal widths, and speed limits needed to accommodate all travelers along K-32 safely; coordinate the study's results with the State's access management policies
- Preserving and increasing parks/open spaces to expand on the idea of "green" in the K-32 corridor, so it not only means jobs, but also recreation, and thereby draws new people to the area
- Allowing the roadway width and amenities along K-32 to respond to the character of the land use and development adjacent to the route
- Improving K-32 by giving it the feel of a "parkway", including curbs and gutters, landscaped medians, turn lanes, tree-lined street edges, lighting throughout, and a new name
- Partnering as "Tri-Cities" to pursue state and federal transportation funding for corridor-wide improvement projects

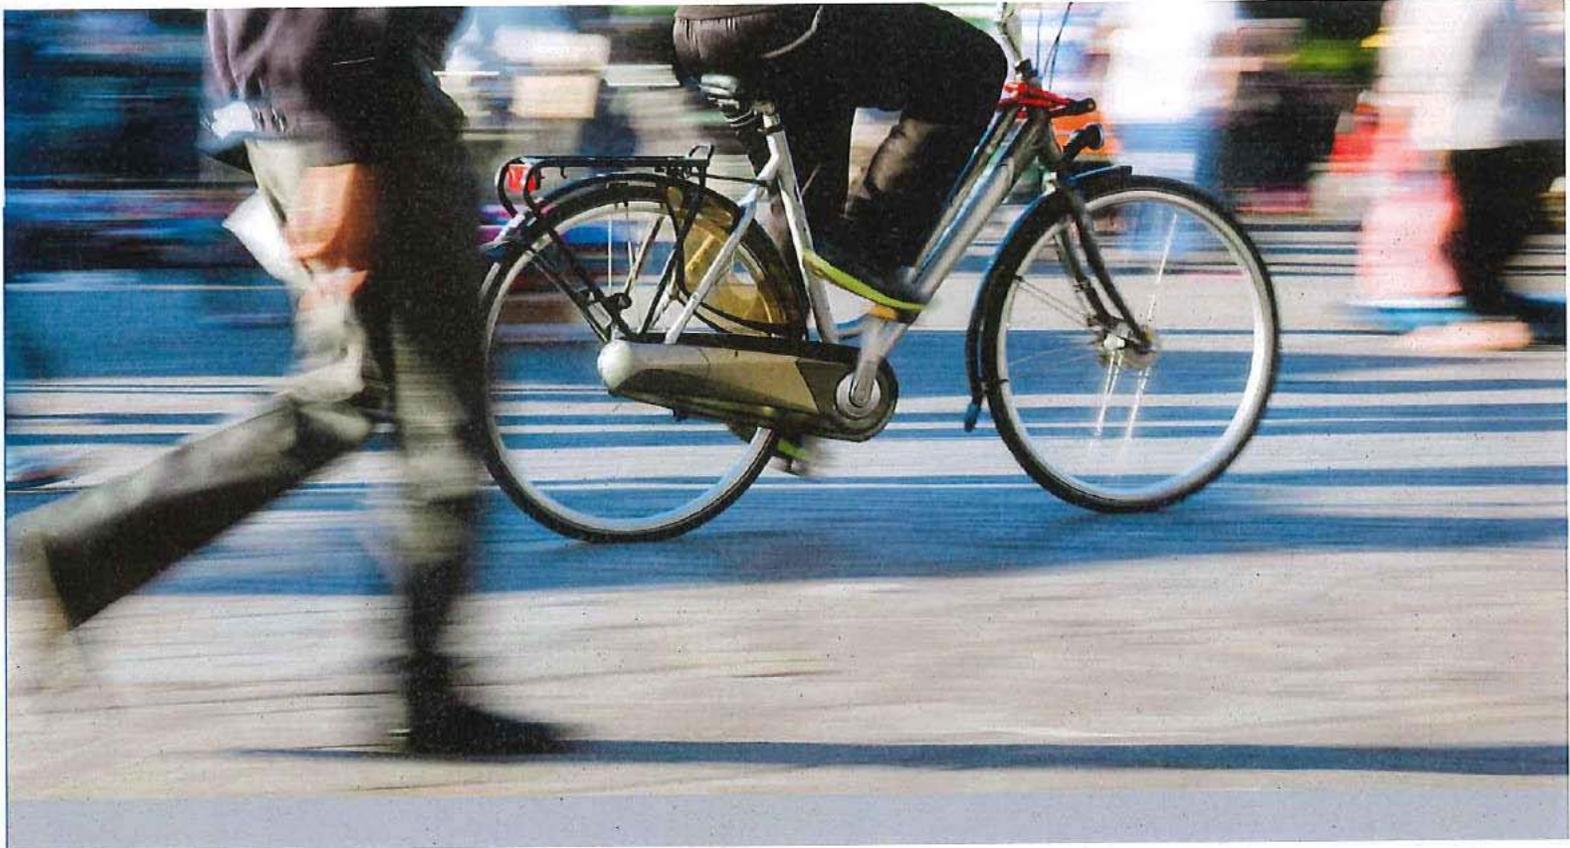

## Anticipated Outcomes

The *K-32 Tri-City Multimodal Redevelopment Plan* recommends the implementation of a series of land use, development, and transportation action steps over the next decade or more. If the recommendations were implemented:

- Industry will be the predominant development type in the corridor and help the area reach the transit densities needed to support on-demand bus service by 2025 or thereafter
- Industrial jobs, including those from green industry, would make up over half of the employment opportunities in the K-32 corridor by 2025 or after
- Recommended future land uses will increase tax revenue in the K-32 corridor; assuming full build out and an assessed valuation equal to the current rate, non-residential development would be a large contributor to the revenue generated
- Most of the housing in the K-32 corridor will be low density or large-lot residential after 2026 if the recommended housing density is developed; as a result, most of the density needed to support bus service would come from industry, not housing
- Conservation development (residential and non-residential) parcels will have greater access to alternative modes of transportation than standard residential and employment parcels after 2026
- More conservation parcels (residential and non-residential) will have access to parks, open space, and trails in the future than typical residential and employment parcels after 2026
- Fewer residential and employment parcels will be within the floodplain or stream buffer; conservation developments will help protect natural features after 2026

## INTRODUCTION

*The Unified Government of Wyandotte County – Kansas City (UG) and the Cities of Bonner Springs and Edwardsville, Kansas, hereafter referred to as the "Tri-Cities", in coordination with the Kansas Department of Transportation and Mid-America Regional Council (MARC), initiated the K-32 Tri-City Multimodal Redevelopment Plan in Wyandotte County during the fall of 2015. It outlines the long-term transportation and redevelopment vision for the 8-mile K-32 corridor, spanning K-32 from N. 57th Street on the east to the westernmost limits of Bonner Springs on the west.*

# Introduction

K-32 is an important vehicular route, connecting Wyandotte County to Greater Kansas City. However, its potential as an economic generator, a multimodal corridor, and an environmental asset is yet unrealized. How K-32's opportunities and challenges are leveraged for overall corridor redevelopment began to be uncovered as the Tri-Cities' Technical Advisory Committee worked with community members, the Stakeholder Advisory Committee, and others through a community-based planning process that concluded during the summer of 2016.

The *K-32 Tri-City Multimodal Redevelopment Plan* provides the framework for the corridor vision. It recommends the action steps that the Tri-Cities should reference as they implement the vision, engaging and coordinating with residents, business and economic development representatives, property owners, transit providers, technical staff, elected and appointed officials, advocates, and many others throughout implementation efforts. Well over a decade is necessary to implement the vision outlined in the K-32 plan. This planning document represents the first step in the process to improve K-32 in Wyandotte County.

## Background

Today the K-32 corridor is Wyandotte County's southern employment center. Over 40% of the planning area from Bonner Springs to Kansas City consists of industrial development and there is countywide interest in pursuing additional industrial development, including green industries, as the corridor redevelops. However, during the 19th century, the corridor was home to traders and farmers, including Delaware Native American Henry Tiblow, Junius G Groves, and Moses and Annie Grinter (of the Delaware Native American tribe).

Henry Tiblow operated the ferry used to cross the Kansas River for the Chouteau brothers' Four Horses Trading Post. The post was located in the area that would become Bonner Springs. The Bonner Springs Improvement Club promoted the high mineral content of the five springs in the area, along with its trees, parks, and proximity to Kansas City to draw investors to the community via train. The Grinter family operated a trading post a few miles east in Kansas City that sold an estimated 160 different types of goods to the relocated Delaware tribe. Since 1971, the Grinters' Kansas City, Kansas home and land has been part of the Grinter Place Historic Site located at 78th Street and K-32. It is the oldest home in the county.

By the 1900s, Edwardsville was an agricultural and trading

hub made famous by agricultural entrepreneur Junius G. Groves, who was "one of the most prosperous African American men in the early twentieth century". Groves was born into slavery, but as a freedman in 1902, he was producing more bushels of potatoes than any other farmer and become known as the "Potato King of the World". He shipped potatoes, other vegetables, and fruit across the United States, Canada, and Mexico.

A railroad spur served the Groves family mansion and rail continues to play a definitive role in the character of the corridor. In fact, some of K-32 was built on the railroad bed for the former Kansas City, Kaw Valley, and Western Railway Interurban Line. The line ran from Lawrence, Kansas to Kansas City, Missouri and through the planning area until the 1960s. It provided both passenger and freight transportation. Union Pacific currently operates a rail line adjacent to the north side of the Kansas River; Burlington North Santa Fe (BNSF) runs a line on the south side of the river. Combined total of 58 freight trains and two AMTRAK passenger trains (Southwest Chief) travel through the corridor, including the town of Muncie (located on the south side of K-32 in Kansas City), on a daily basis.

The rail movements support the corridor's industrial character and likely contribute to the 1,000 trucks that the Kansas Department of Transportation estimates travel through the corridor daily. Trucks enter from the major north-south routes, including I-435 and K-7, and travel to shipping and distribution destinations along K-32. As a result, Bonner Springs has created a truck route that prevents trucks from traveling through the heart of the city's Historic Downtown. An initial Quiet Zone Study was conducted for the corridor as part of the Tri-Cities' planning process to identify potential improvement projects and costs. Such could reduce train noise and make it easier for adults and children to cross K-32 at key locations, such as 4th Street in Edwardsville. The Quiet Zone Study is available in the appendix of this planning document.

## Planning Process

The *K-32 Tri-City Multimodal Redevelopment Plan* utilized a phased planning process that engaged community members and stakeholders in conversations about the corridor's existing needs and future improvements. The process began during the fall of 2015 and concluded during the summer of 2016.

### Schedule for the Planning Process

## EXISTING CONDITIONS

*The following is a summary of the existing conditions in the K-32 corridor. They involve: demographics, land use and zoning patterns, transit (bus and rail), and a review of existing adopted plans.*

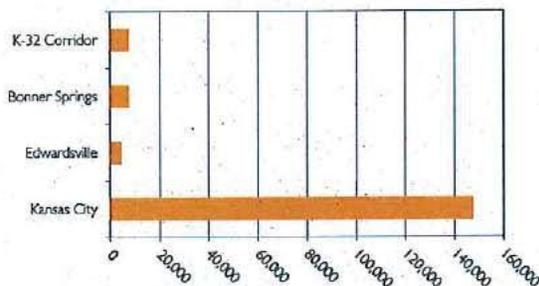

# Existing Conditions

## People

According to estimates from the 2014-2010 U.S. Census American Community Survey 5-Year Estimate:

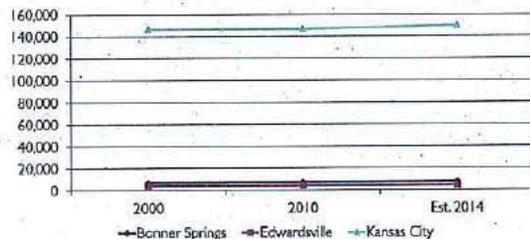

**Population:** An estimated 7,455 people live within the corridor:

2014 Population

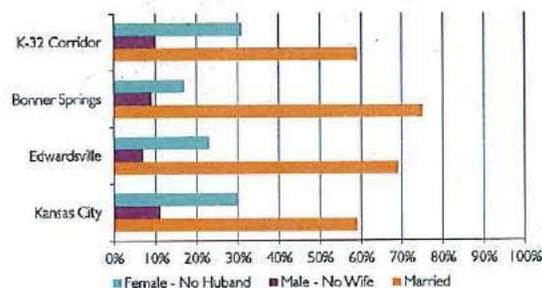

**Trends:** The Tri-Cities have maintained consistent populations over the last 14 years. Kansas City experienced a loss of less than 1% between 2000 and 2010 but gained an estimated 2.6% more residents in the four years that followed.

Population Trends (2000 - 2014 Estimate)

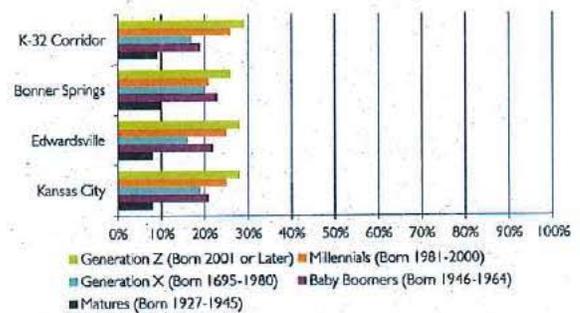

**Family Status:** Married families make up most of the households in the K-32 corridor and the Tri-Cities.

2014 Family Status

**Generations:** Younger generations (Generation Z and Millennials) make up over half of the population in the K-32 corridor. According to Dr. Jill Novak (University of Phoenix and Texas A&M University), each generation offers several characteristics:

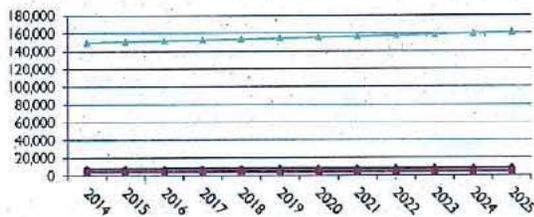

2014 Generations

- **Matures:** They are the richest, most free-spending retirees in history, and to them, "retirement" means sitting in a rocking chair and living your final days in peace.
- **Baby Boomers:** For them "retirement" means enjoying life after the children have left home and they are the first generation to have this belief. Their lives are longer because they developed hobbies and exercise.
- **Generation X:** They change careers frequently, often seven changes in a lifespan, and are focused on their neighborhood rather than the world. Xers are survivors as individuals, want to be available for their children and develop their marriages.
- **Millennials:** Also known as Generation Y, Millennials are unfamiliar with a world that lacks computers as they have never known such. They view the world accessible 24 hours a day and seven days a week. They desire quick and instant access to information and processing. Millennials typically have strong views and prefer to work in teams.
- **Generation Z:** They are knowledgeable, savvy consumers who are inundated with brands and know how to get exactly what they want. They also have eco-fatigue, so they are tired of messaging that focuses on saving the environment.

**Growth:** Population estimates in the Tri-Cities were mostly flat from 2000 to 2014. A straight-line projection based on the less than 1% annual population growth that each of city experienced in the last four years indicates similar flat growth. However, as the number of industrial jobs in the corridor grows, the daytime population is likely to increase. Greater housing and transportation options would encourage workers to live within the corridor near their jobs. Major redevelopment initiatives, incentives, and marketing may also trigger corridor population growth.

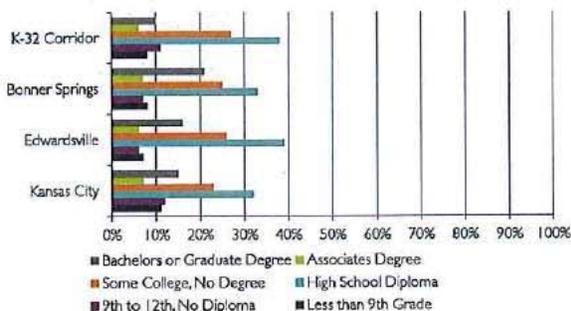

Population Growth  
(Straight-line projection, 2014 - 2025)

## Education

**Attainment:** The two most common levels of educational attainment in the K-32 corridor and Tri-Cities are a high school diploma and some college (no degree). According to a recent report from American Works, "[a] postsecondary degree or relevant workforce certification is the 'new minimum' for the future workforce to meet the demands of the emerging job market and access a middle-class life or beyond... The emerging economy will provide few well-paying jobs for workers who merely have a high-school education or less. In addition, researchers estimate that approximately half of all job openings over the next decade will require more than a high school diploma, although not necessarily a four-year degree". If green industry and other industrial sectors are emphasized in Wyandotte County, especially within the K-32 corridor, job-training programs will be necessary to help some local residents secure the new jobs.

2014 Educational Attainment

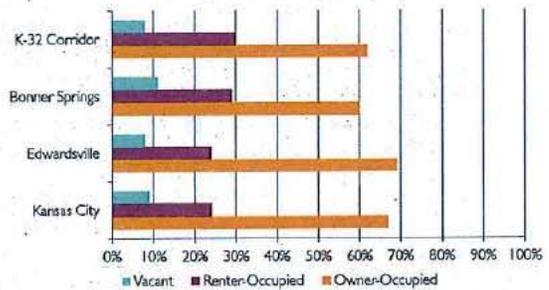

## Housing

Estimates from the 2010-2014 U.S. Census American Community Survey 5-Year Estimate indicate:

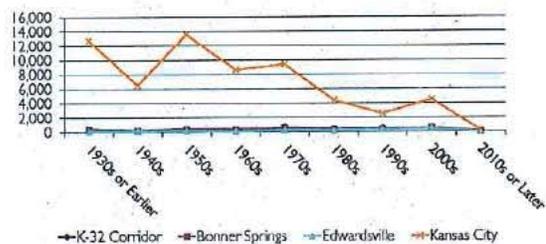

**Occupancy:** The proportions of housing occupancy in the K-32 corridor are comparable to those in the Tri-Cities. There are more owner- than renter-occupied or vacant housing units.

2014 Housing Occupancy

**Construction:** Housing units were built in greater numbers in Kansas City than within the K-32 corridor, Edwardsville, and Bonner Springs. The Tri-Cities and K-32 corridor have experienced a decrease in housing construction efforts since 2010. If the corridor hopes to retain Millennials, Baby Boomers, and Matures, the construction of additional housing that varies in type and/or design may be necessary.

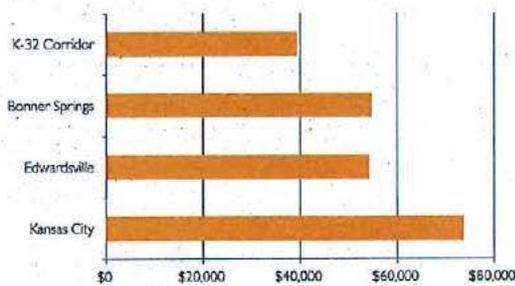

Housing Construction

## Income

**Median Income:** The median household income in the K-32 corridor is \$39,404 which is similar to that in Wyandotte County overall (\$39,326). It is approximately 28% lower than the median incomes of Bonner Springs and Edwardsville and 54% lower than the Kansas City median. The Gini Index indicates that income inequality is greater in Kansas City than in either Edwardsville or Bonner Springs at .434, .362, and .355, respectively. Equality is achieved when the index is zero. New jobs in the K-32 corridor should help improve the income equality outcomes of residents.

2014 Median Household Income

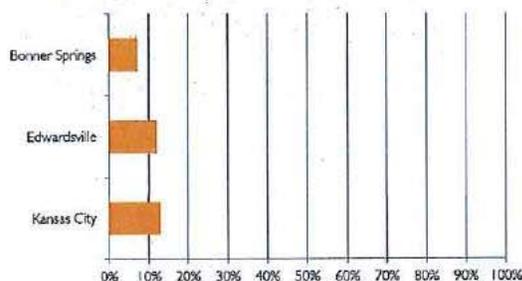

## Employment

The 2010-2014 U.S. Census American Community Survey 5-Year Estimate indicates:

**Concentrations:** Approximately 61,700 people worked in Wyandotte County but lived outside of it while an estimated 22,200 both lived and worked within the county during 2014. Most large employment concentrations in the K-32 planning area are located in Edwardsville and Kansas City. Tiblow Transit currently services the Bonner Springs portion of the planning area. If transit were provided throughout the corridor, stops could correspond with employment areas and other activity centers, such as downtowns.

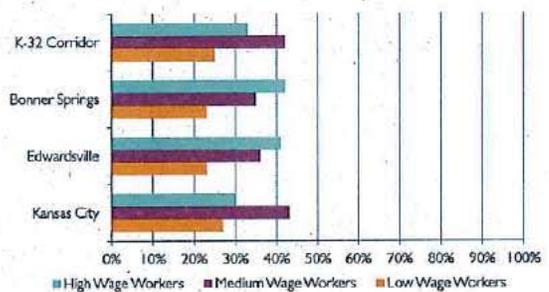

2014 Unemployment

**Unemployment:** The proportion of unemployed residents is higher in all three communities than the current national average (5%). It is 13% in Kansas City, 12% in Edwardsville, and 7.2% in Bonner Springs. Providing job training programs and on-the-job training for new employees may help decrease proportions of unemployment in the K-32 corridor:

**Wages:** The U.S. Census provides data on the wages workers earn. Those with low wages earn \$1,250/month, medium wage earners receive \$1,250-\$3,333/month, and high wage earners make over \$3,333 a month. Over 40% of workers in the K-32 corridor are medium wage earners, which is comparable to earners in Kansas City (43%). Ideally, when additional jobs, including those in green industries, are added to the K-32 corridor; they will enable workers to earn higher wages.

2014 Worker Wages

## Existing Conditions

**Job Sectors:** Education and Healthcare, Manufacturing, Scientific and Professional, and Retail Trade are among the top industries in Wyandotte County/Kansas City, Kansas. The University of Kansas Hospital and Medical Center, General Motors, Kansas City, Kansas Public Schools (USD #500), and UG are the largest employers. Fast Companies' 2015 article, "The Top Jobs in 10 Years Might Not Be What You Expect", predicts the following:

- 25% of today's full-time workers will be working on-demand as free lancers for short contracts – jobs that can done digitally from anywhere are top candidates
- Free-lance professional managers or directors who specialize in very specific projects
- Free-lance teachers to respond to the increasing demand for on-line courses
- Urban/artesian farmers
- End-of life planners (By 2025, the World Health Organization predicts that 63% of the global population will live to over the age of 65—some well past their centenary)
- Senior care-givers for the aging population
- Remote health care specialists who can manage some of the work of local or regional healthcare specialists who need to work on more critical patients and needs
- Neurological implant technicians
- Smart-home handy/repair people
- Virtual reality experience designers
- 3-D print design specialists

Further, the 2012 U.S. News: Money article, "Where Will the Jobs be in 2020", states:

*“urban areas with high demand for educated workers are the best bets for finding work... The U.S. Bureau of Labor Statistics (BLS) projects that positions in healthcare and social assistance, professional and business services, and construction will represent more than half of the 20.5 million new jobs it expects to be created by 2020. More than 34 million additional job openings will be available to replace workers leaving the labor force. And of the five occupations expected to have the largest number of openings, only one of them, nursing, requires an associate's degree or higher. More to the point, those five occupations don't create economic growth but reflect growth that's being driven in other, higher-skilled sectors of a local economy. These “driver” careers increasingly demand college and advanced degrees. Educational attainment is thus a powerful predictor of where you should look for work”*

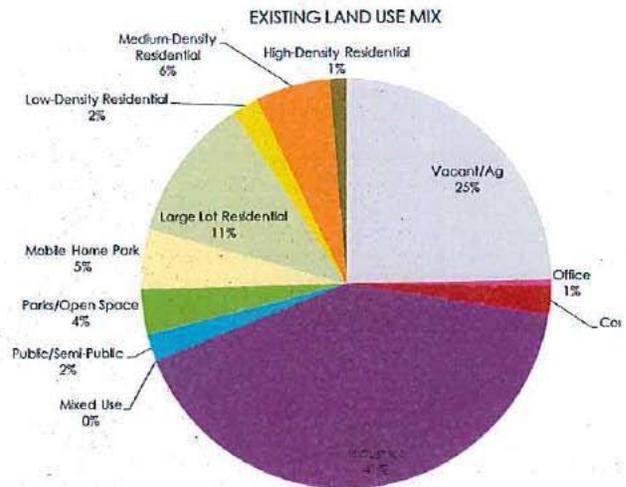

If the K-32 planning area is to continue developing as an employment center that focuses on the development of green industries that pollute less and help solve complicated environmental issues, job training locations should also be identified and created to help workers obtain higher-paying green jobs and those in other industries from the entry-level position and beyond.

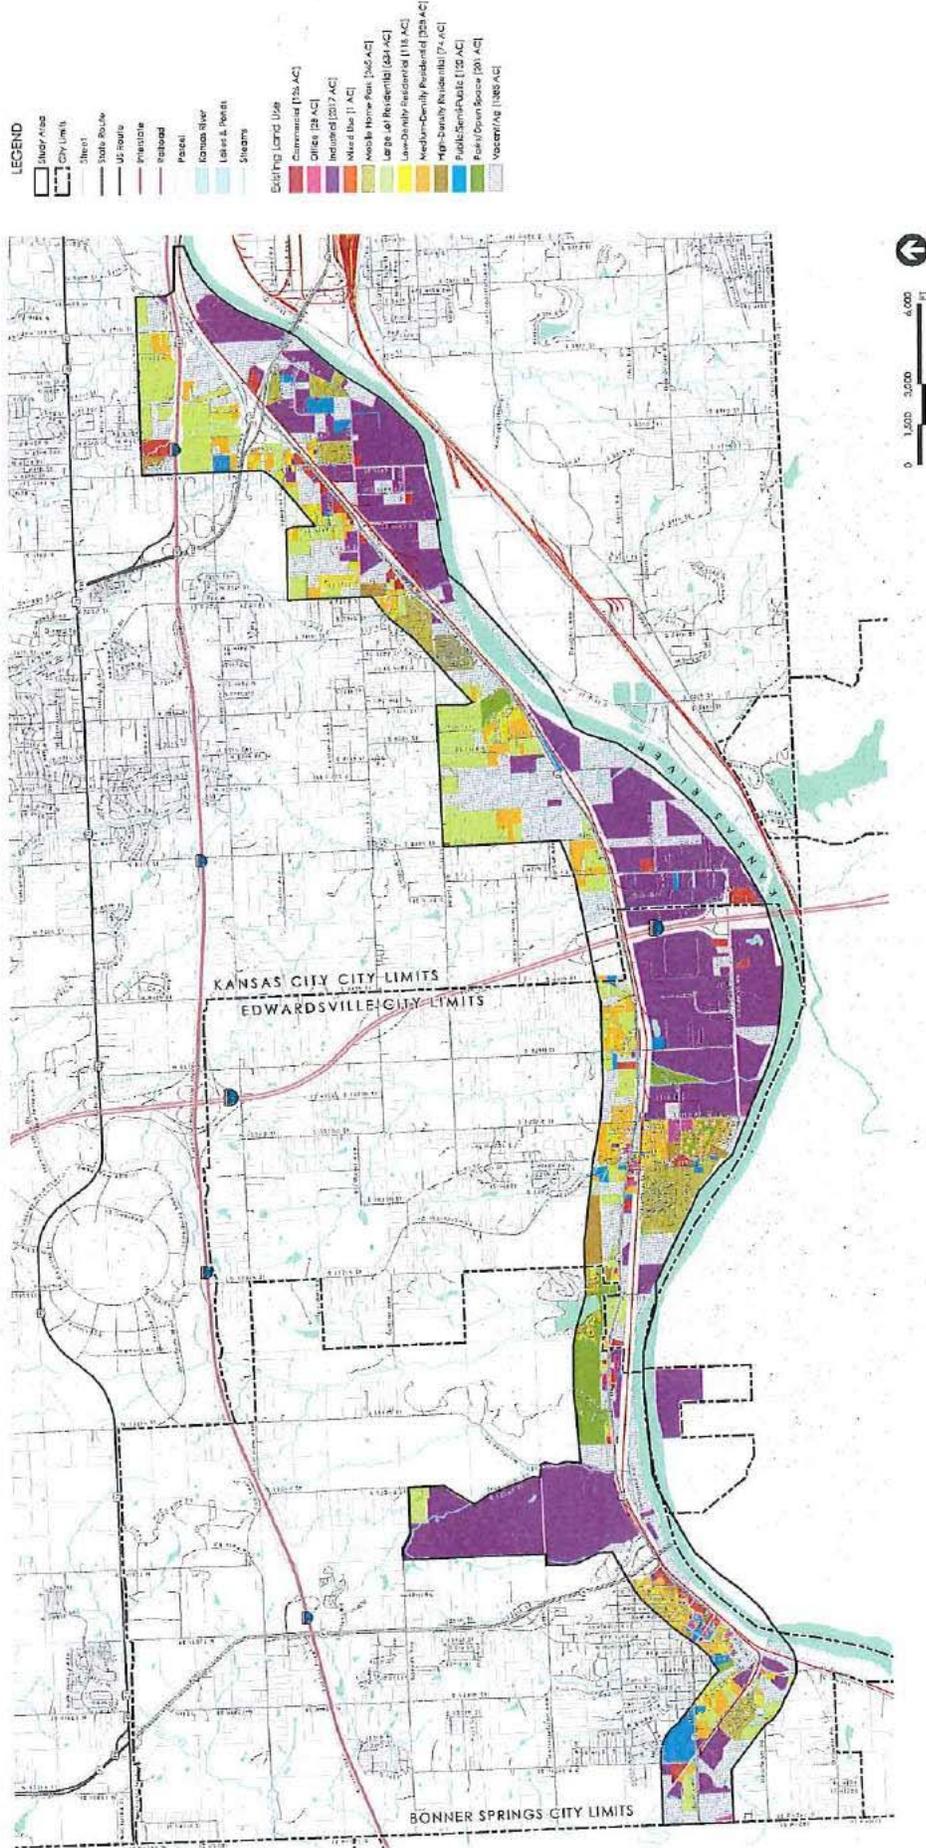

## Existing Land Use

The K-32 corridor consists of 7,092 acres. Industrial, vacant/ agricultural, and large lot residential land uses make up over 75% of the existing development in the area.

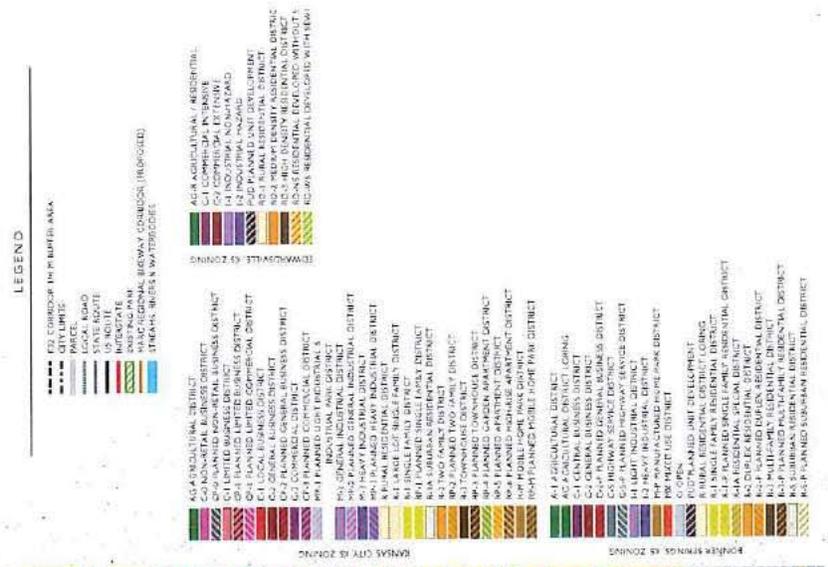

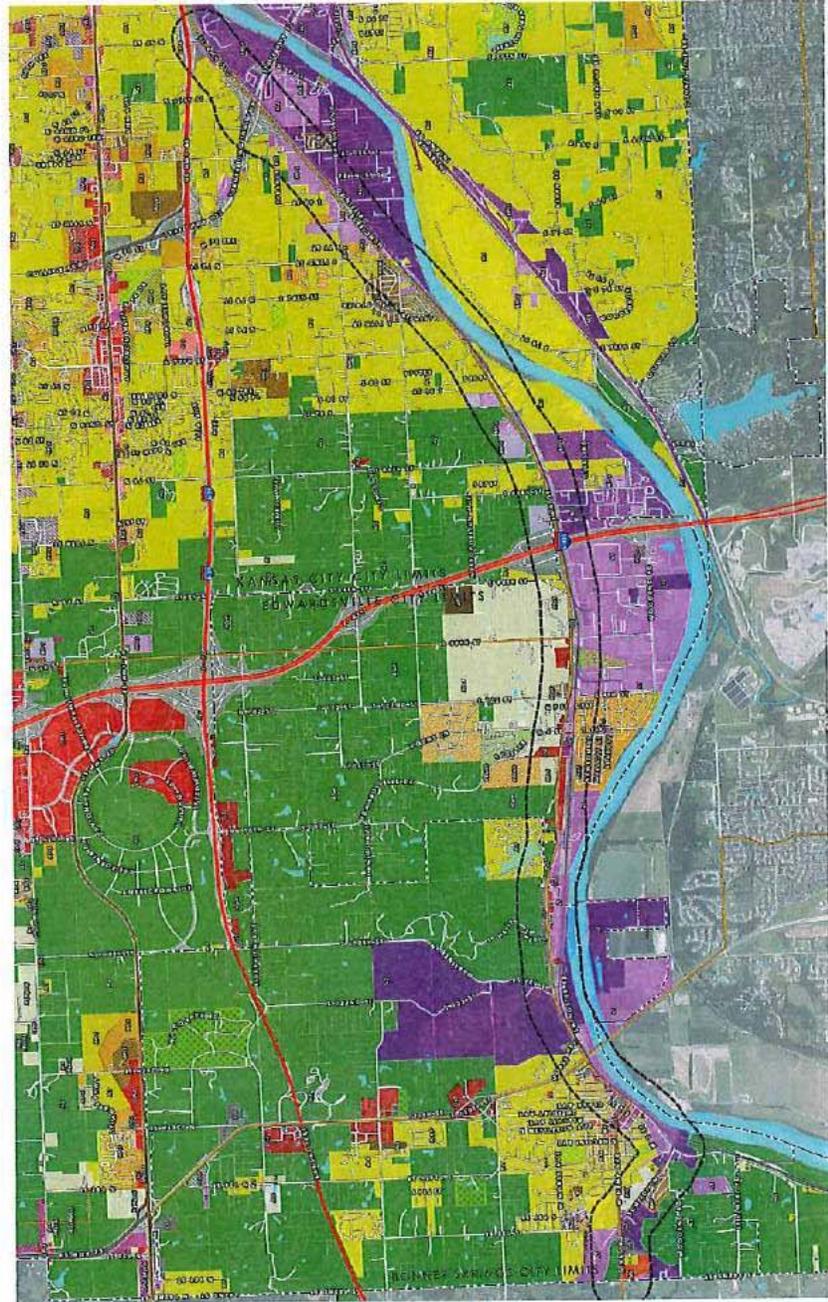

Existing Conditions

K-32 Tri-City Multimodal Redevelopment Plan  
**EXISTING LAND USE**

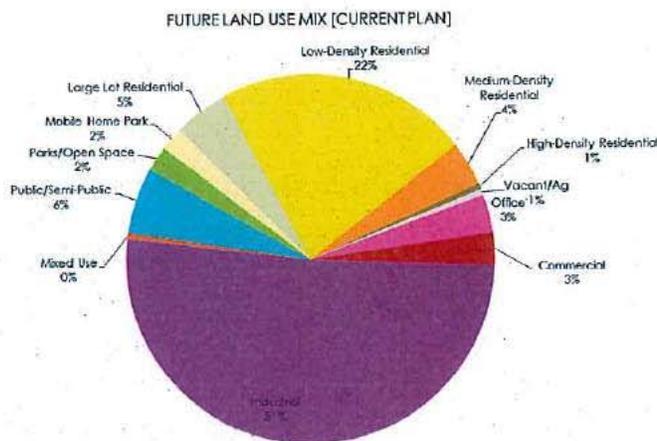

K-32 Tri-City Multimodal Redevelopment Plan  
**EXISTING ZONING**

Existing zoning is consistent with the land use and supports various types of industrial and residential development.

## Adopted Future Land Use

Together the City of Bonner Springs' Vision 2025 Comprehensive Plan (adopted in 2008), The Edwardsville Plan (adopted in 2012), and UG's City-wide Master Plan (adopted in 2008) recommend that about half (51%) of the K-32 planning area develop industrially. Low-density residential uses would make up the second most prominent type of development, consisting of 22% of the overall corridor:

In addition, the Vision 2025 Comprehensive Plan recommends the following in relation to K-32 in Bonner Springs:

### Parks, Open Space, and Connectivity:

- Plan for a trail along abandoned railroad from 138th at K-32, west and north, with a small park at head-of-trail south of Whispering Woods.
- Pursue land and easement donation / dedications for trails and bike lanes, and secure land or easements from landowners and new developments.
- Incorporate trails into the design and construction of new developments.
- Provide connectivity between all trails and public open spaces.

### Economic Development:

- Promote community aesthetic improvements to create a "Bonner Springs character" in community gateways, such as at the K-32 entrance to the city.
- Establish landscape corridor planting themes for K-7/K-32.

### Future Commercial Needs:

- Plan for good urban design and implementation of its major transportation plan at key interchanges, including those at and intersections with K-32 through the city.
- Extend the "atmosphere" of the central business district boundary to include adjacent residential and commercial areas down side streets, and consider a roundabout at the K-32 intersection.
- Provide "way-finding" directional signage from K-32 and incorporate a special design theme consistent with the historic character of downtown that links the downtown with its perimeter districts, both residential and commercial.

The *Edwardsville Plan* recommends that growth and expansion of the community be enhanced south of and along K-32. It recommends continued concentration of development along K-32 at 4th Street and west of 4th due to the steep terrain on the north and floodplain designation on the south of K-32. The *Edwardsville Plan* also notes the following stormwater and sewer concerns for Edwardsville in relations to the K-32 planning area:

**Stormwater:** Many of the city's streets use a combination of drainage ditches and culverts to divert stormwater. Newer subdivisions and some recently improved roads include curbs and gutters. Stormwater drainage can be a challenging issue due to the city's proximity to the flat areas near the River, and the hilly terrain north of K-32.

**Sewer:** Sewer lines are currently limited to the southern portion of K-32 and extend slightly north of the highway. Hundreds of septic systems serve residential and other properties throughout Edwardsville. This limits the types of development that can currently occur within the city, and the densities at which they can develop. The following facilities are located within Edwardsville to serve the City's residents:

- Woodend Pump Station (9th and Woodend)
- Lift Station at 106th and Kaw Drive is served by 6" lines
- Lift Station at 11th and Black is served by 8" lines

**Betts Creek Sub-Drainage Area:** About 2,880 acres in size north of K-32 Highway, the entire Betts Creek sub-drainage area makes up almost half of the total land area for the city of Edwardsville, or 4.5 square miles of the approximately 9.5 square miles of land area within the corporate limits of Edwardsville. There are three branches to the Betts Creek sub-drainage basin. The western leg drains to near the intersection of Edwardsville Road and K-32 Highway and encompasses the drainage area between 104th Street and Edwardsville Road. The main branch of Betts Creek extends essentially from 110th Street and Interstate 70 at the northern extent of the city, south to near the intersection of 98th Street and K-32 Highway. The eastern branch of Betts Creek generally drains only the land area between 98th Street and 94th Street, south of Kansas Avenue.

**Kaw Valley:** Characterized mostly by the lowland surrounding the Kansas River, the Kaw Valley land area in the city is located mostly south of K-32. This relatively flat land area was formed over many centuries by the Kansas River meandering from its river banks and flooding. The downstream portions of the other sub-drainage basins technically encompass the Kaw Valley area of Edwardsville as each creek drains into the Kansas River. However, the lack of slope to the ground, the unique soils of the valley floor area, and the potential of flash flooding define the unique development characteristics of this southern portion of the city.

The City-wide Master Plan includes the following recommendations for the K-32 area in Kansas City:

**Urban Design:** Use urban design and streetscape improvements to change 78th Street (from K-32 to Parallel Parkway) and Kansas Avenue (from the Kansas/Missouri state line to the Turner Diagonal) into a Primary Image Streets where they serve as one of the first and final impressions of the city for visitors, residents, and workers near the K-32 corridor. Detailed direction for Primary Image Streets includes:

- Incorporating (a minimum 10-foot wide with a minimum 5-foot landscaping zone between the walk and back of the curb) on both sides of the street to accommodate comfortable pedestrian and bicycle connections as well as retail businesses and outdoor cafes.
- Gateways and/or public art incorporated into major intersections and districts.
- Street trees, planters, site furnishings (benches, movable planters, way-finding, interpretive signage bike racks, trash receptacles), decorative banners, and pedestrian lighting are also recommended.

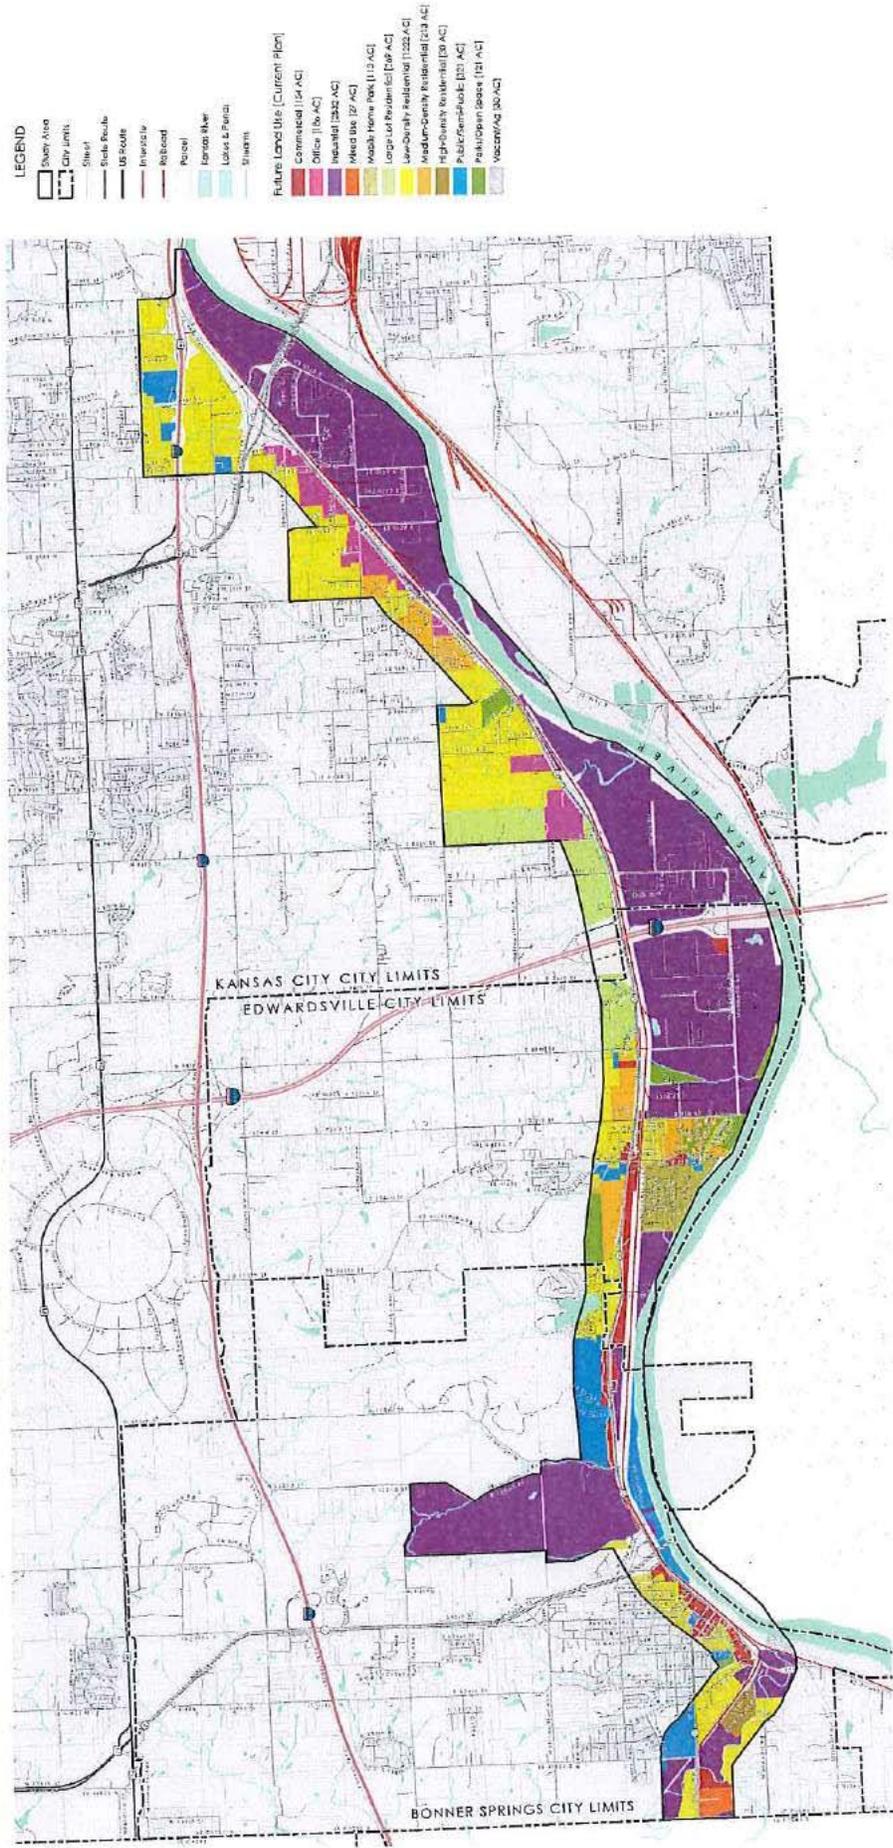

**Image Streets:** Reinforce the perceptions of individual neighborhoods by creating Secondary Image Streets, e.g. at Kansas Avenue (Turn Diagonal to I-435). Specific guidance for Secondary Image Streets includes:

- Sidewalks on both sides of the street (a minimum of 8-feet wide with a 5-foot minimum landscaping zone between the walk and the back of curb) to accommodate pedestrian connections.
- Minor "neighborhood" gateways at major intersections.
- Decorative banners on street lights that highlight neighborhood identity.
- Basic site furnishings (benches, bike racks, trash receptacles) at major intersections and transit stops.
- Pedestrian lighting to illuminate neighborhood-retail areas, trails, parks frontages, and activity areas. Lighting fixture styles should reflect neighborhood character.

#### **Revitalization and Green Design:**

- Provide a jobs/housing balance and utilize existing incentives, such as Empowerment Zones, to encourage local businesses to hire residents who live within the city.
- Work with the State of Kansas to upgrade local incentive packages and tools for attracting and retaining businesses and industries thereby making the city more competitive with other cities within the metropolitan area and across the country. Such incentive packages should be targeted to businesses and industries that create local jobs.
- Upgrading aging and deteriorating infrastructure to attract new industries and businesses.
- Attracting "green" industries that employ a large percentage of local residents and provide job training programs.
- Working with MARC, the Environmental Protection Agency (EPA), American Institute of Architects (AIA), American Planning Associates (APA), Kansas City Home Builders Association (KCHBA), and others to provide training and education to building professionals, homebuyers, homeowners, realtors, lenders and general public about best practices for green and energy efficient construction (Leadership in Energy and Environmental Design standards).
- Proactively acquire, clean up and reuse brownfields sites.
- Construct bicycle and pedestrian trail connections to complete the portion of the MetroGreen trail system along the Kansas River and construct associated amenities, such as ample landscape buffers from adjacent industrial uses, streetscape and pedestrian-scale lighting.

K-32 Tri-City Multimodal Redevelopment Plan  
**FUTURE LAND USE (current plan)**

Transportation

**Roadways:** K-32 is an east-west state highway with paved shoulders, medians (striped, concrete, and raised), and turn lanes at key intersections. It consists of 13.5-foot asphalt lanes and ranges from two to five lanes in width. Because it functions as both a state highway and city street, K-32 is also referred to as a City Connecting Link whereby KDOT and the Tri-Cities coordinate responsibilities.

**Bike Routes, Sidewalks, and Trails:** Although cyclists, walkers, and joggers use the route, there are no such specific accommodations for them on K-32 with the sidewalks on the north side of K-32 in downtown Bonner Springs. Sidewalks are also present on some of the local, north-south streets that connect to K-32, specifically those west of the K-7/1-70 interchange (on the north side of K-32) and at 4th Street (south of K-32).

MARC's MetroGreen plan recommends the development a multiuse trail along K-32 and K-7. During the K-32 planning process, the City of Bonner Springs and KDOT began initial discussions for installing a portion of trail on K-7 over K-32 that could connect to the city's parks. The City of Edwardsville is constructing trails near its south industrial area and near the Kansas River. UG adopted policies also support trail development in Wyandotte County's K-32 corridor.

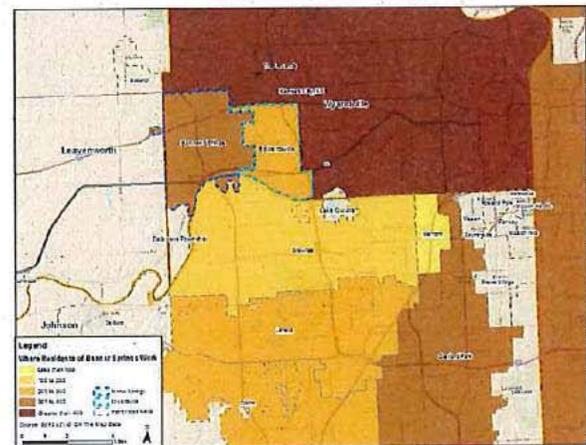

Future sidewalk and/or multiuse trail construction will be necessary if K-32 is to become a multimodal corridor that enables pedestrians to travel from all directions and reach key destinations, such as redevelopment downtown areas, employment centers, and entertainment options.

**Transit Service:** Bus service is available in some parts of the K-32 corridor. Tiblow Transit operates within Bonner Springs Monday through Friday, 8:30 a.m. to 4:30 p.m. The service connects to parts of Kansas City, Kansas three days a week; provides pickups in Edwardsville two days a week, serves parts of Kansas City, Kansas three days a week, and serves the Johnson County Medical facility two days a week. UG Transit (UGT) operates Route 115 Kansas Avenue, which operates at the very eastern edge of the K-32 corridor at Kansas Avenue and 78th. The routes operate Monday through Friday from 5:30 a.m. to 7:30 p.m. at 60-minute frequency.

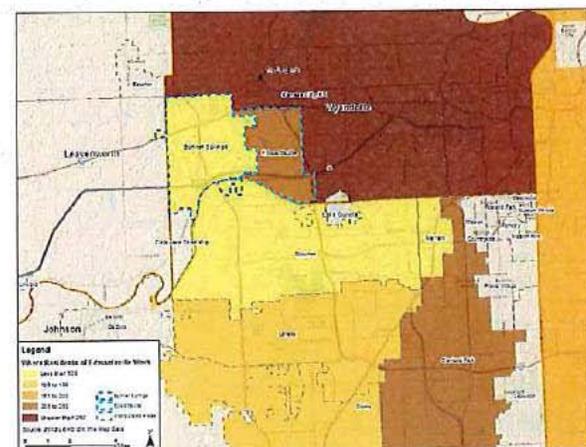

**Transportation to Work:** Based on the 2010-2014 U.S. Census American Community Survey, most (81%) of Wyandotte County residents drive along to work. An estimated 14% carpool and the balance walk, use public transit or other transit, and work from home. The average commute time is approximately 21 minutes. No transit service currently serves the entirety of the K-32 corridor. A large number of workers and residents travel between Edwardsville, Bonner Springs, and surrounding communities.

Adding regularly scheduled transit options would increase the ability of employees to access employment sites within the corridor and in other parts of the metropolitan area. Transit options could also provide corridor residents with improved access to medical, social, retail, and transportation

Where Bonner Springs Residents Work (see Transit Memo in appendix)

Historic Edwardsville Residents Work (see Transit Memo in appendix)

services outside the corridor. What's more, increasing corridor transportation options could increase the appeal of living in or visiting the corridor for Millennials who increasingly prefer less dependence on personal vehicles.

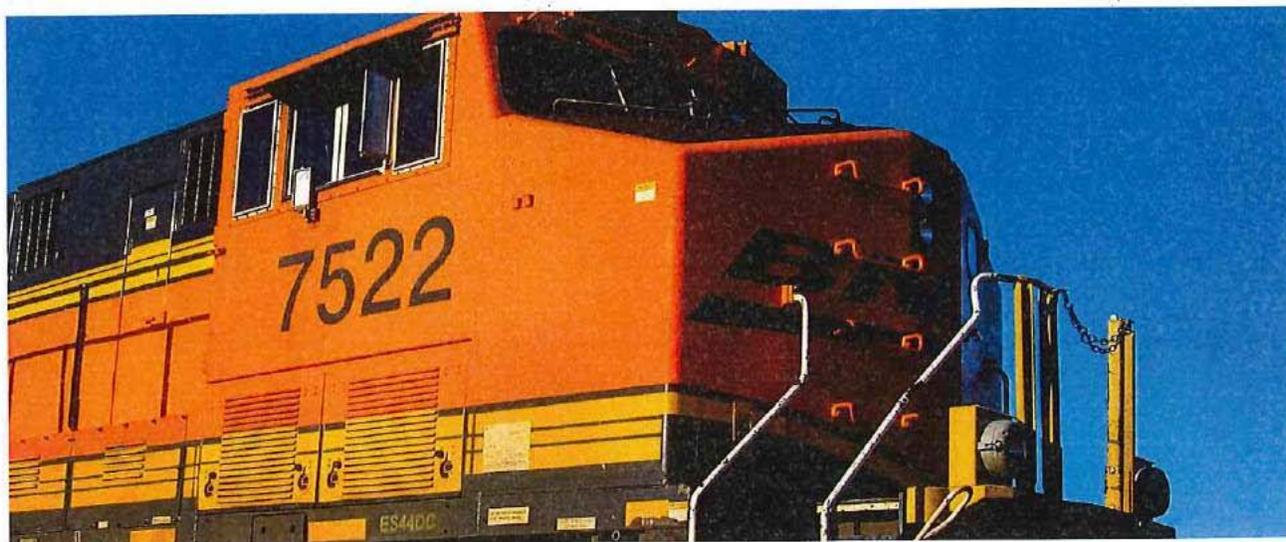

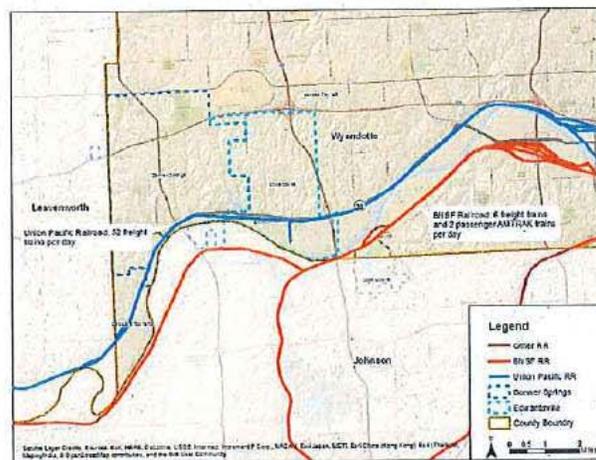

**Freight:** K-32 parallels two railroad lines. The Union Pacific line operates directly adjacent to the K-32 corridor on the north side of the Kaw River and runs 52 freight trains per day. The BNSF operates on the south side of the river with six freight trains and two AMTRAK passenger trains (Southwest Chief) per day. KDOT estimates 1,000 trucks travel K-32 each day. Community members have commented that the traffic creates congestion on K-32. They have also commented about issues with train noise and crossing the tracks.

**Interurban Passenger Rail:** A 2002 study examined the feasibility of operating commuter rail between Lawrence and Kansas City. The BNSF line was evaluated as an alternative due to the rail line accessing much higher population portions between Lawrence and Kansas City than the Union Pacific line. The study recommended that capacity improvements would be necessary at several points along the line to avoid conflicts with freight or existing Amtrak service.

- Capacity improvements would be required at De Soto to allow the RoadRailer (AMTRAK mail and express) switching operations during commuter periods, at Argentine Yards to mitigate the very heavy freight traffic, and at Union Station to provide rail connections to the station itself. In addition, the railroad may require a "capacity contribution" from commuter rail as a cost of entry to the line.

- Because the capital costs necessary to make the line suitable for commuter passenger rail service would be \$117 million, with a \$5.2 million annual operating cost for three trips in the morning and three in the evening, with a projected 2,238 daily rail trips, this was determined to be insufficient ridership for the cost. The study estimated that the subsidy required for a daily round-trip between Lawrence and Kansas City would be \$12.98 per rider, which would result in a \$3.7 million annual operating subsidy.
- Since the time of the interurban study, population annual growth rate of 0.6% in Wyandotte County, 2.85% in Bonner Springs, and 1.4% in Edwardsville, or elsewhere along the BNSF line, has not been sufficient to increase ridership potential. Figure 4 displays the existing rail service.

Railroad Service (see Transit Memo in appendix)

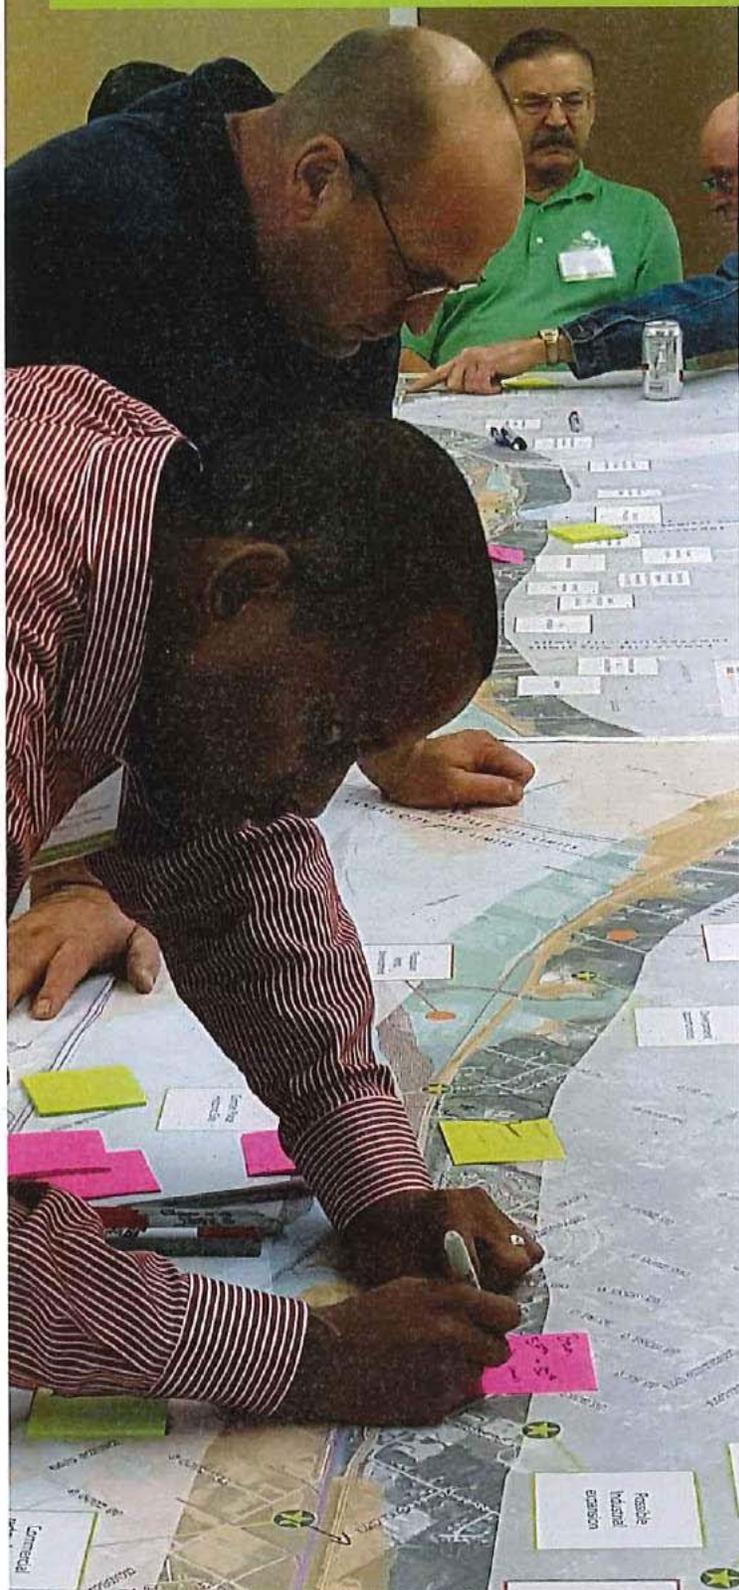

## COMMUNITY ENGAGEMENT

*Over the course of nearly a year, the planning team engaged Bonner Springs, Edwardsville, and Kansas City community members in person and thousands in the Tri-cities and nearby communities via online tools during the community engagement process for the K-32 Tri-City Multimodal Redevelopment Plan. Four periods of community engagement took place in coordination with the four phases of the planning process. Each began with a Stakeholder Advisory Committee meeting followed by two public meetings (alternating Tri-City locations), an online opinion poll/comment form, social media posts (Facebook.com), and a Planning Commission update.*

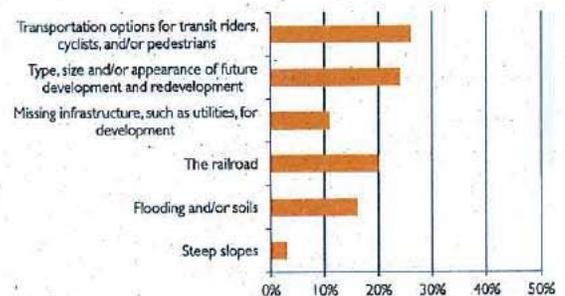

# Community Engagement

## Round One

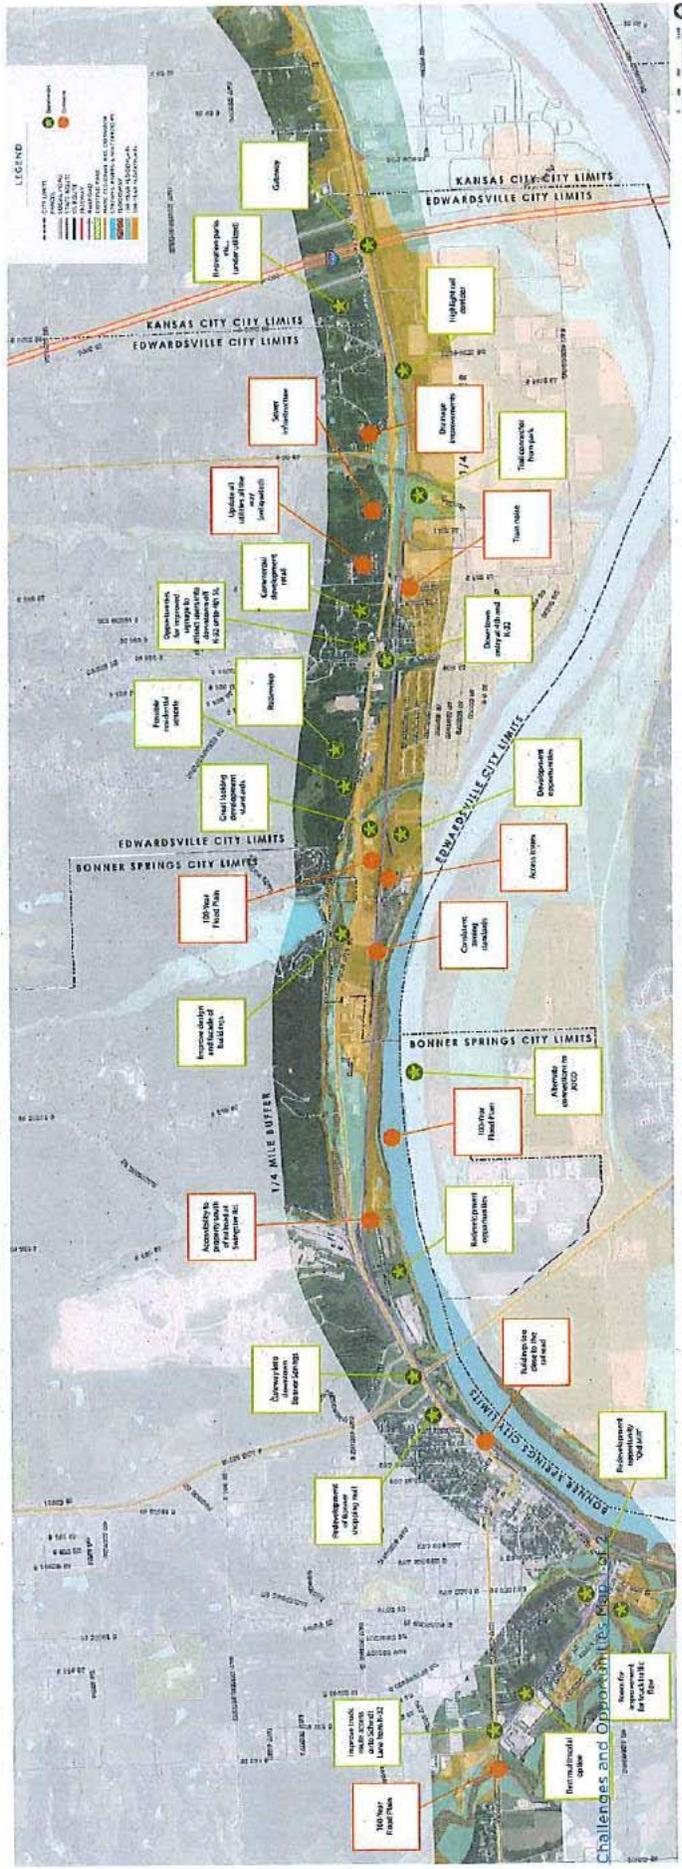

The first period focused on identifying the vision for the corridor; top challenges and opportunities, and ideal accomplishments. Participants mapped their comments on large-scale, corridor maps and provided additional feedback about the types of challenges and opportunities that were identified and why.

### Top Challenges

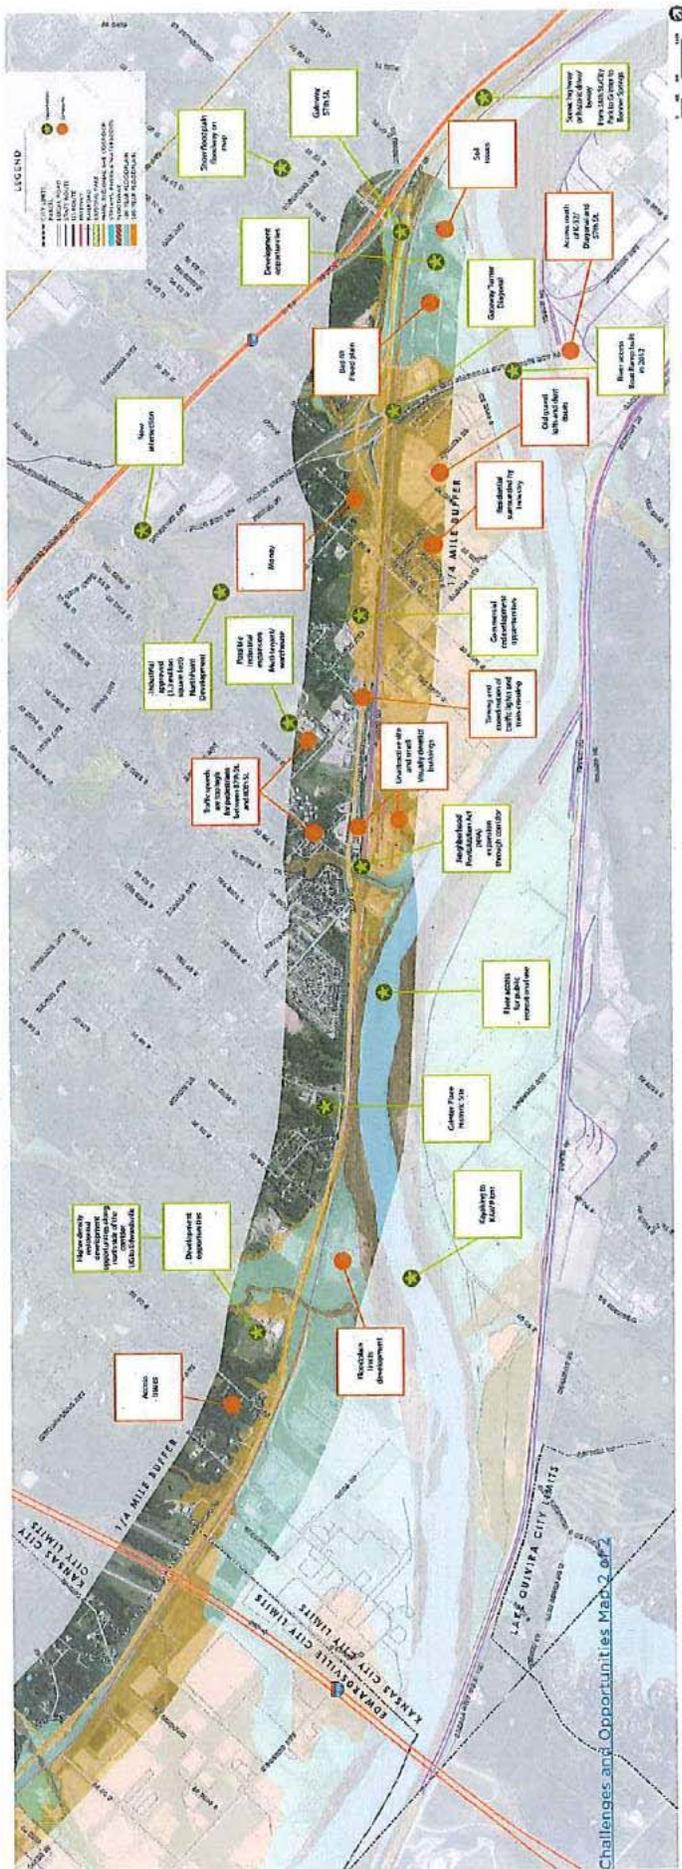

The top three challenges related to the railroad, multimodal transportation options, and the type, size, and scale of future development. Meeting participants commented about the lack of sidewalks for walking along K-32 to shopping destinations and restaurants and pedestrians accommodations for crossing K-32 to reach Edwardsville Elementary School and other locations. They also discussed emergency response and access issues tied to trains blocking entry into Edwardsville. Additional comments about the railroad focused on train noise and associated traffic. Other comments concerned the appearance of the overall corridor. Community members expressed a desire to place utility lines underground, improve and maintain building facades, and a need to be sensitive about the way in which future development relates and transitions over time in relation to existing uses throughout the corridor.

K-32 Tri-City Multimodal Redevelopment Plan  
**CHALLENGES AND OPPORTUNITIES (1 of 2)**

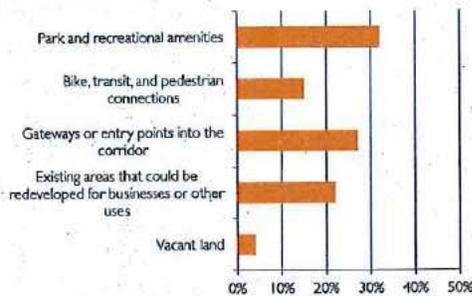

K-32 Tri-City Multimodal Redevelopment Plan  
**CHALLENGES AND OPPORTUNITIES (2 of 2)**

The top two opportunities to leverage for K-32's future included park and recreational amenities and existing areas that could redevelop for businesses or other uses. Community members commented about the importance of redeveloping existing and/or vacant land along the highway and updating downtown areas in a way that could attract new investment, add jobs, and increase the tax base. They also commented about incentivizing existing businesses to update and/or clean up their buildings. Building updates would happen in coordination with infrastructure improvements, such as the installation of curbs, gutters, utility burial, highway paving/restriping, and more. Feedback about recreational opportunities involved connecting to the Kansas River by providing access for kayaking, canoeing, and fishing. Adding a trail between the river and the railroad was also important to community members.

Top Opportunities

### Round Two

The second period of engagement centered on identifying redevelopment areas, investing in transit and bicycle/pedestrian improvements, and converting K-32 to a parkway.

Meeting attendees discussed the possibility of redeveloping the areas generally defined as Sheidt Lane, downtowns, K-7 Interchange, large parcels of land, 65th Street and Turner Diagonal. They commented that targeted activities made sense and stressed the importance of focusing on Downtown Bonner Springs and Edwardsville, creating unique personalities for them, adding retail, restaurants, and other items. They commented that redevelopment should consider existing businesses and residents, as redevelopment activities in one area could have negative stormwater (silt and erosion control) impacts on nearby properties, such as Lake of the Forest.

Transportation-related comments focused on the need for ingress/egress improvements at various corridor intersections. The need for safe pedestrian access across K-32 was also a topic of conversation. Community members commented about including a robust trails network that would attract Millennials who are moving back to the area because of its safe and affordable feel and amenities. They also commented that K-32 is a popular route for both bicyclists and motorcycle riders.

Community members were in favor of exploring the idea of converting K-32 to a landscaped parkway similar to the way in which Highway 210 (Armour Road) travels through North Kansas City in Missouri, transforming from a 7- and 6-lane divided roadway to a 3-lane road (see photo below). Downtown Highway 210 is tree lined, includes two through lanes, a central turn lane, traffic signals, diagonal parking, sidewalks, and buildings that are close to the sidewalk edge.

## Round Three

A third period of meetings and polling concerned the phased improvement scenario for the corridor. The scenario consisted of a realistic, 10-year vision (2015-2025) and a year 11+ (2026 and Beyond) aspiration for land use, development, and multimodal transportation. Those who attended the meetings shared their thoughts about changing the character of roadway to correspond to the types of activity centers located along it, such as downtowns, historic sites, employment concentrations, and other areas.

They commented that a proactive approach to redeveloping downtown Bonner Springs and Edwardsville was important and discussed place-making strategies, the importance of balancing natural with industrial uses, and eliminating the perception that the Kansas River is a barrier. They also commented that transit connections and vanpooling locations would help visitors and job seekers outside the corridor reach it from places close to I-70, such as the Legends at Village West shopping center and the proposed Turner Diagonal Business Park in Kansas City, Kansas.

Additional conversations with stakeholders indicated that the corridor community was against narrowing K-32 through downtown areas. They commented that doing so would result in negative impacts, such as traffic bypassing their community and becoming too congested. They also commented that cyclists travel K-32 but expressed concern about adding bicycle accommodations to a route that semi-trucks also use.

## Round Four

The fourth and final period of meetings and polling concerned the initial draft of the K-32 Tri-City Multimodal Redevelopment Plan and its implementation steps. Participants commented on the most important implementation priorities for the corridor. Key priorities related to redevelopment, transportation, parks and open space, place-making, and financing improvements. priority implementation recommendations. When asked about the degree of importance that should be assigned to top priority recommendations, community members responded that the following were very important:

- Conducting a traffic study to 1) determine the roadway improvements needed to accommodate all travelers along K-32 safely and 2) improve access management policies
- Targetting redevelopment activities to top priority activity centers, including downtowns and other areas

*Community members review the phased improvement scenarios for the K-32 corridor*

*Community members review top priority recommendations for improving K-32 in Wyandotte County*

## PRELIMINARY IMPROVEMENT CONCEPTS

*Rather than pursuing block-by-block redevelopment of the 8-mile K-32 corridor, the project team and community members explored focus areas for potential improvement efforts.*

## Potential Improvements

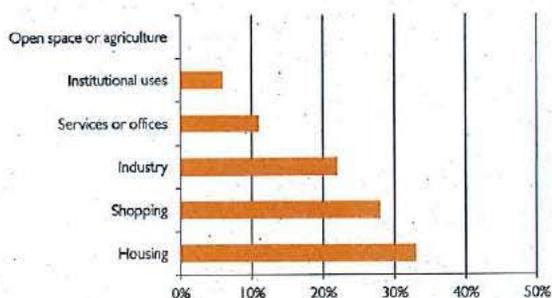

Key improvement concepts involved:

- Scheidt Lane
- Downtown Bonner Springs and Edwardsville
- K-7 Interchange
- Large parcels of land
- 5th Street and Turner Diagonal
- 78th Street
- Converting K-32 into a parkway
- Transit routes

## Scheidt Lane Area

The Scheidt Lane area was identified because it largely consists of older residential development that is in need of repair and/or upgrade. The area is also adjacent to industrial development, opposite a railroad spur, and within the floodplain. If it redeveloped, it could become open space, additional industry, or mixed-income housing. Community members commented that the area should remain residential, specifically high density residential, to continue to accommodate the Bonner Springs Estates mobile home park.

Scheidt Lane Development Options

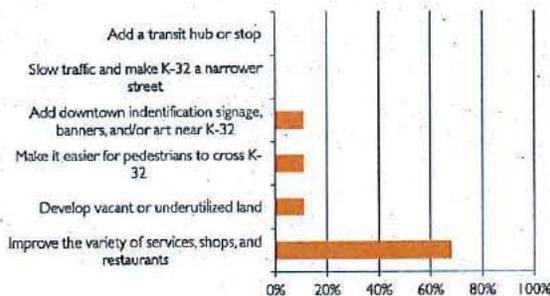

## Downtowns

Downtown Bonner Springs and Downtown Edwardsville were targets because early in the planning process, community member identified their improvement as an important opportunity for the corridor that could benefit residents and visitors alike. Improving the downtown areas might also slow the traffic that community members have commented (throughout the planning process) travels too fast through both cities. If purposeful redevelopment and investment efforts were pursued, both downtowns could be transformed into active, multimodal, mixed use (residential/office retail or retail/service/public-semi-public) centers with unique community identities that reflect their historic pasts.

The City of Bonner Springs has invested in banners, pedestrian-level lighting, and sidewalks in its downtown, including along K-32. It is also interested in redeveloping its Historic Downtown. Underutilized sites could be redeveloped with retail services, such as a neighborhood market, on the ground floor and residential above. If Tiblow Transit relocates closer to K-32, it could become a multimodal transit hub and include a transit route that travels along K-32, into Historic Downtown Bonner Springs, and through the redevelopment site.

Important Strategies for Strengthening Downtown Areas

Sample Downtown Bonner Springs Improvement Concept

## Preliminary Improvement Concepts

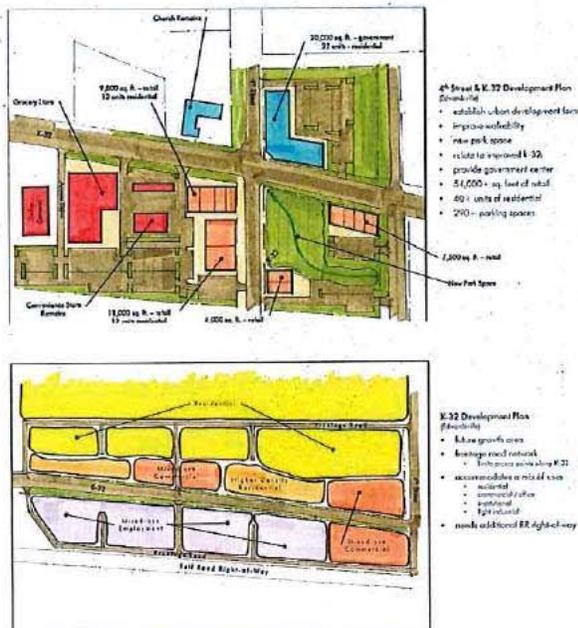

The City of Edwardsville conducted a building efficiency and safety analysis during 2015/2016; and as a result, has expressed interest in relocating its municipal offices to a vacant parcel of land located on the northeast corner of K-32 at 4th Street. The move could provide the opportunity to combine government services with the community's retail needs, including providing medical or pharmaceutical services for the city's older residents, in the same building. Moving north would also create an opportunity to redevelop the existing government complex as a second mixed use node that serves the needs of Edwardsville residents. Fourth Street would then connect both potential mixed-use centers and provide not only a vehicular connection, but also a multiuse path for those walking or biking between the nodes, Edwardsville Elementary School, Edwardsville Christian Church, the local U.S. Post Office, housing, as well as the Edwardsville Community Center.

Community members indicated that the most important revitalization strategy for Downtown Bonner Springs and Edwardsville was improving the variety of services, shops, and restaurants. The strategy of slowing traffic along K-32 and narrowing it, e.g. from four lanes to three lanes and including an on-street bike path, sidewalks that are buffered by on-street parking, and landscape amenities was not selected, although doing so would enhance downtown revitalization and redevelopment activities and improve traffic safety.

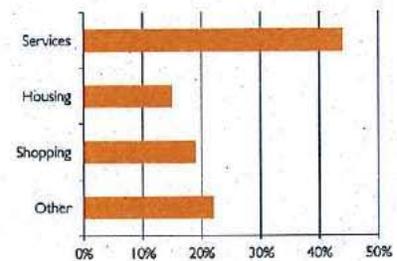

## K-7 Interchange Area

The K-7 Interchange area is the gateway into Bonner Springs for all travelers coming from Edwardsville on the west, both Bonner Springs and Kansas City on the north, and Shawnee on the south. Land on the north side of K-32, just west of the interchange and near Werner Street, is developed with auto-oriented uses, including a small commercial shopping center that is approximately 50% vacant and a gas station. If redeveloped, the new center could offer retail/services and/or entertainment. If the center's buildings were positioned near the street edge, parking could be located to the side and/or rear of the buildings or even on the street. The shift in building and parking location would support a more walkable, downtown shopping experience. In addition, there is an opportunity to improve the connection to Moon Marble Company, which is directly across the street on the south side of K-32. Community members have frequently commented that Moon Marble is a major tourist and shopping destination.

### Sample 4th Street Improvement Concepts

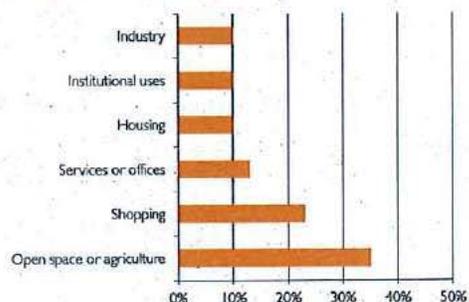

K-7 Interchange Development Options

## Large Parcels

Development parcels in single ownership offer broad opportunities for development and redevelopment, as they could become new neighborhoods, recreation and entertainment destinations, or other features. However, community members commented that those that are east of the K-7 and I-70 interchange in Bonner Springs should remain undeveloped or unchanged. Doing so is consistent with recent development initiatives, such as Holliday Sand and Gravel Company's plans to develop its site into an industrial park.

Development Options for Large Parcels

## 78th Street Area

The State of Kansas owns the Grinter Historic site, including the Grinter Barn, home, and surrounding land. Undeveloped land exists near the northeast corner of K-32 at 78th Street. A large area of open space surrounded by woodlands characterizes the site. If the trees on the site were preserved, there is potential to develop a restaurant and entertainment venue on the remaining land and link it to the Grinter Museum via pedestrian path. Community members have expressed a desire for more entertainment options within the K-32 corridor; such as a restaurant to help draw people to the Grinter Museum and thereby make the site an even more appealing destination. Community members also commented that a turn lane be added to K-32 to permit safer turning movements onto 78th Street. What's more, other community members have reached out to elected officials, asking for the installation of a traffic signal at this location.

**Grinter Place Development Plan**

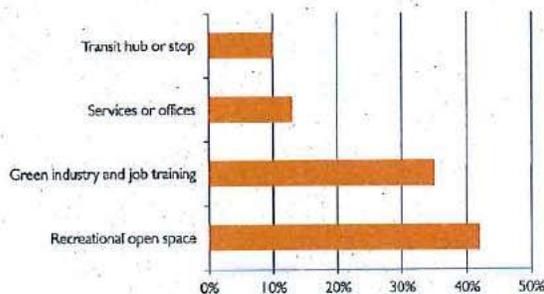

- maintain natural/visual character
- maintain historic site and structures
- create new retail, restaurant, recreation & entertainment venues
  - provide parking for new venue
- connect historic site and new venue by road and by trail
- use existing clearing and road use for recreation and trail system

## 65th Street and Turner Diagonal Area

The area east and west of 65th Street and the Turner Diagonal is home to approximately 1/3 of the industrial development within the K-32 corridor. The portion south of K-32 is mostly within the floodplain. Its redevelopment potential beyond industry is limited. If a significant redevelopment opportunity were to become available, it would be possible to streamline interior roadway circulation, manage access, and more efficiently serve business and industrial park development and the truck traffic it generates. Land on the north side of K-32 could provide industrial uses or job training services that complement the one million square feet of industrial development proposed for the 130-acre Turner Commerce Center just north of the Turner Diagonal.

Because of flooding concerns, community members commented that the future development of the land in the 65th and Turner Diagonal area, be redeveloped as a combination of green industry, job training, and recreational/open space. Community members also commented that providing access to the river would benefit the entire K-32 corridor; as the nearest access point beyond the corridor is in DeSoto, Kansas. Providing river access to this area of the planning may be possible via Mill Creek. Other river access points would be located farther west, for example at K-7 in Bonner Springs and 4th and 98th Streets in Edwardsville. Further, incorporating stormwater best management practices into the area could help address future flooding issues, as some of the streets in this target area have concrete drainage ditches. In the future, the ditches could become vegetated swales in small drainage areas that have low water runoff.

65th Street & Turner Diagonal Dev. Options

# Preliminary Improvement Concepts

## Converting K-32 to a Parkway

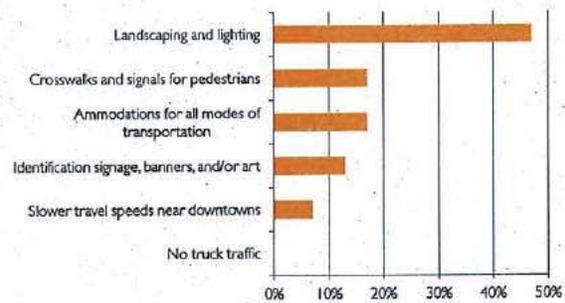

Today K-32 is a generally a 4- to 5-lane, divided state highway that motorists use to quickly connect to employment destinations, highways (K-7 and US-69) and interstates (I-435 and I-70), shopping, and other destinations. Its speed limit ranges from 30-35 mph near the downtown areas to 55 mph outside of them. It includes signals at key intersections, such as Kansas Avenue, 4th Street, Cedar Street, and other locations.

To help slow traffic and incorporate bicycle/pedestrian accommodations, it may be possible to modify K-32 to look and feel like a parkway. Typical parkways are wide, median-divided roadways lined with trees and lighting. They may also include turn lanes and bicycle/pedestrian paths. Community members were in favor of the idea of converting the feel of K-32 into a parkway rather than maintaining it as a state highway. Lighting was the feature noted most important to include with the concept. There was also support for the idea of renaming K-32 to "Kaw Valley Parkway", "Kaw River Parkway", or "Kaw River Scenic Byway", which opens opportunities to create marketing and branding materials (signage, banners, art, and much more) for the corridor that describe it as a destination of the same name while reflecting the uniqueness of each of the Tri-Cities.

## Sample Parkway Concept

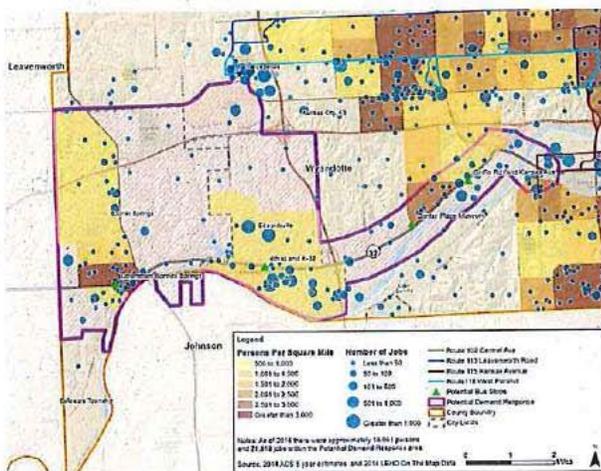

Converting K-32 to a Parkway

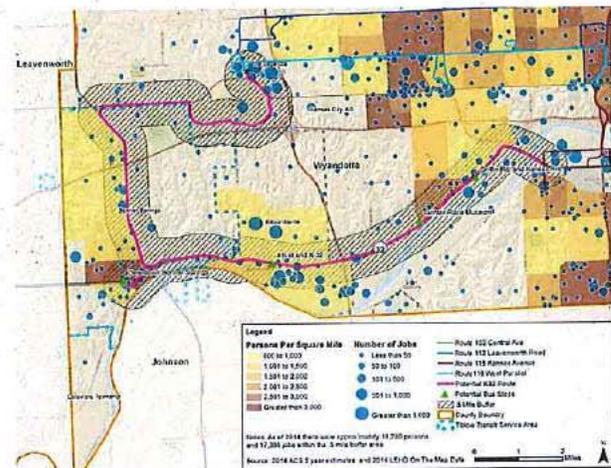

## Transit Routes

Because of the costs and densities associated with providing rail transit in the corridor, the planning team explored on-demand and fixed route bus services.

### Option for On-demand Bus Service

### Option for Fixed Route Bus Service

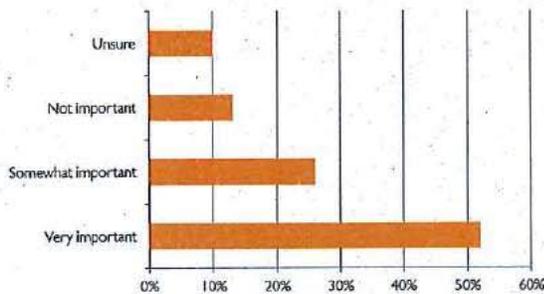

**Estimated Transit Costs**

Type	Description	Service Span	Frequency	Annual Operating Costs
MetroFlex	<ul style="list-style-type: none"> <li>Improves the existing demand-response service and could be implemented with less capital and operations investment than other alternatives</li> <li>Increases the service areas to all of Bonner Springs and Edwardsville</li> <li>Connects into Kansas City at Village West and along Kansas Avenue</li> </ul>	Monday-Friday from 8 AM to 5:30PM	On-demand	\$241,000
Fixed Route (Baseline)	<ul style="list-style-type: none"> <li>Introduces regularly scheduled fixed route service throughout the corridor</li> <li>Includes bus stops at (a minimum) of downtown Bonner Springs, Edwardsville at 4th Street, Grinter Museum, industrial employment opportunities at on Kansas Avenue, and the Legends at Village West</li> </ul>	Monday-Friday from 8 AM to 7:30PM	60 minutes	\$708,000
Fixed Route (Higher frequency)	<ul style="list-style-type: none"> <li>Includes added frequency, flexibility, and convenience for riders</li> </ul>	Monday-Friday from 8 AM to 7:30PM	30 minutes	\$1,290,000

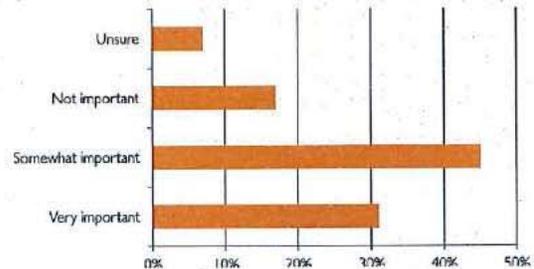

In addition, community members commented that investing in transportation projects that improve bicycle/pedestrian accommodations and transit were somewhat and very important. This suggests the potential for the creation of a multimodal transportation network in the corridor. The Tri-Cities could jointly pursue funding and incorporate the network into targeted redevelopment and/or development locations.

When asked about the importance of increasing housing densities to support better transit (bus and/or rail), community members indicated that doing so was somewhat or very important. The City of Bonner Springs currently operates Tiblow Transit within its city limits. Community response indicated that there was interest in exploring the expansion of the service to areas beyond the city, recognizing that future transit service would likely be limited to on-demand bus service until greater population and employment densities reach the thresholds that could support an investment in fixed route bus service and/or rail.

Investment in Transportation that improves transit, and bicycle/pedestrian options

Increasing Housing Densities to Support Better Transit (bus and/or rail)

## RECOMMENDATIONS

*The review of existing conditions, analysis of challenges and opportunities, and input from community members on the preliminary improvement concepts helped frame the recommended action steps for the K-32 corridor.*

The resulting recommendations support the vision and assume a combination of realistic and aspirational efforts will be coordinated to achieve it. Recommended actions steps relate to redevelopment, parks and greenways, transportation, infrastructure, place-making, environmental considerations, and financing improvements. They are organized into the following categories:

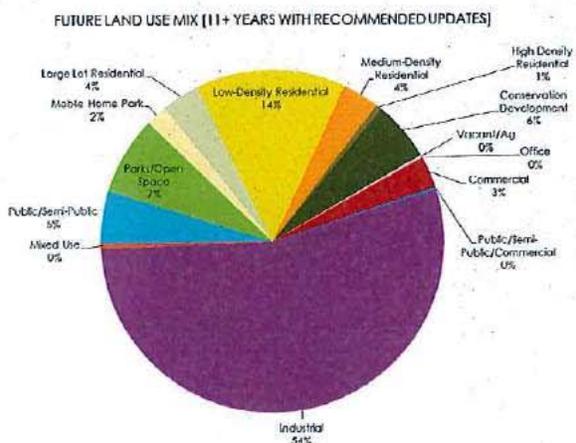

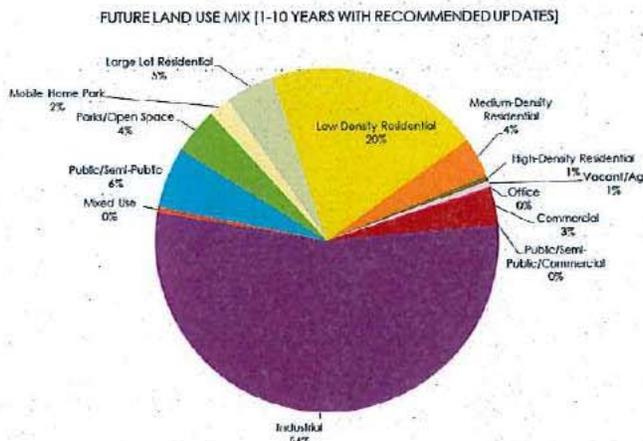

- Corridor-wide
- Bonner Springs
- Edwardsville
- Kansas City

*“Creating a regional destination characterized by green industries and business parks, attractive development, strong downtowns, and recreational areas set within a scenic and friendly environment that is accessible to residents and visitors by walking, biking, riding transit, and/or driving”*

## Corridor -Wide

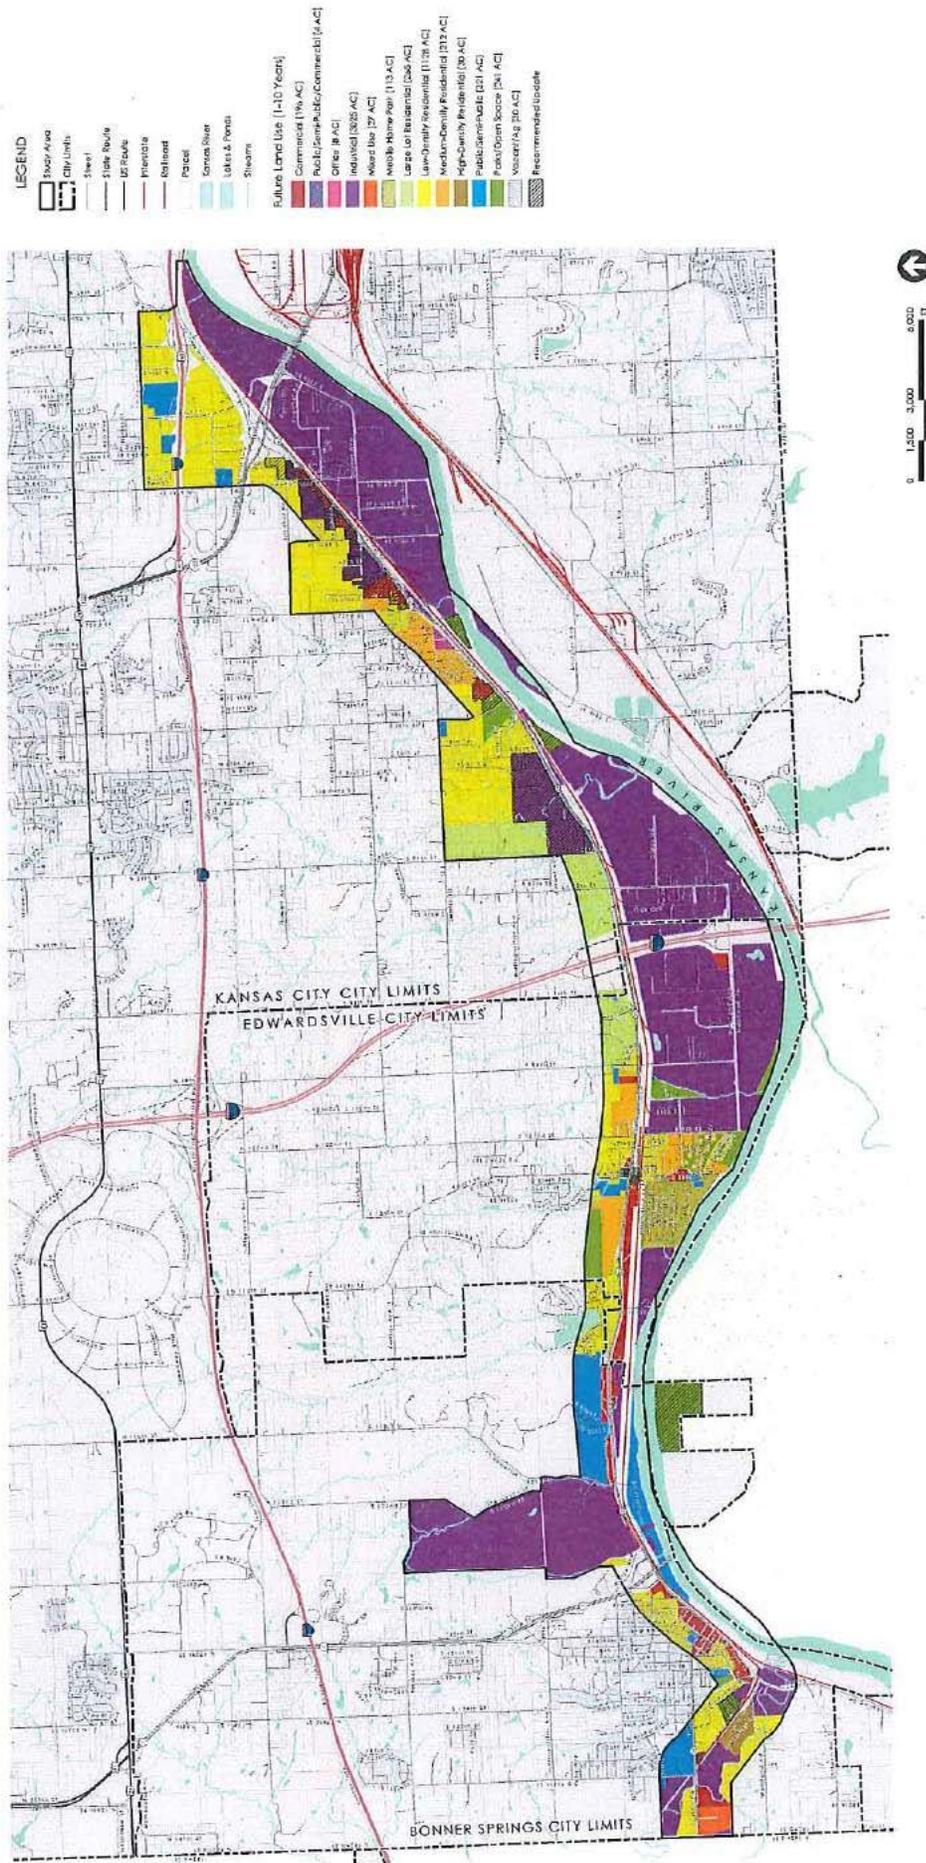

### Action Steps for Redevelopment

- Target redevelopment activities to top priority activity centers, including K-32 in Historic Downtown Bonner Springs, near K-7, 4th Street, 78th Street, and the 65th Street/Turner Diagonal areas
- Establish public-private partnerships to achieve desired land use and development outcomes
- Support industrial expansion in south Wyandotte County by allowing industry to continue occupying more parcels in the K-32 corridor than any other type of land use and development
- Encourage the continued development of the K-32 corridor as an employment center that draws workers from beyond the planning area to train for and obtain jobs at K-32's green industries and business parks
- Incentivize the development of green industries within the K-32 corridor that provide job training, employ a large percentage of local workers, and pay higher wages
- Combine industrial investment with compatible investments in human capital, providing workers with a combination of job training and on-the-job training for the wide range of jobs that are available in the K-32 corridor
- Explore the connections between green industry and health and wellness and leverage them to promote the development of K-32 as a “green” corridor that benefits residents, workers, and visitors
- Encourage redevelopment efforts, such as business and industrial park development, that will help the K-32 corridor reach the population and employment densities necessary to support on-demand transit service
- Conduct a market study to define the capacity and potential for retail/service and entertainment development in the corridor
- Increase housing diversity (type, location, and cost) to attract young families and professionals to the corridor and encourage older residents to age in place

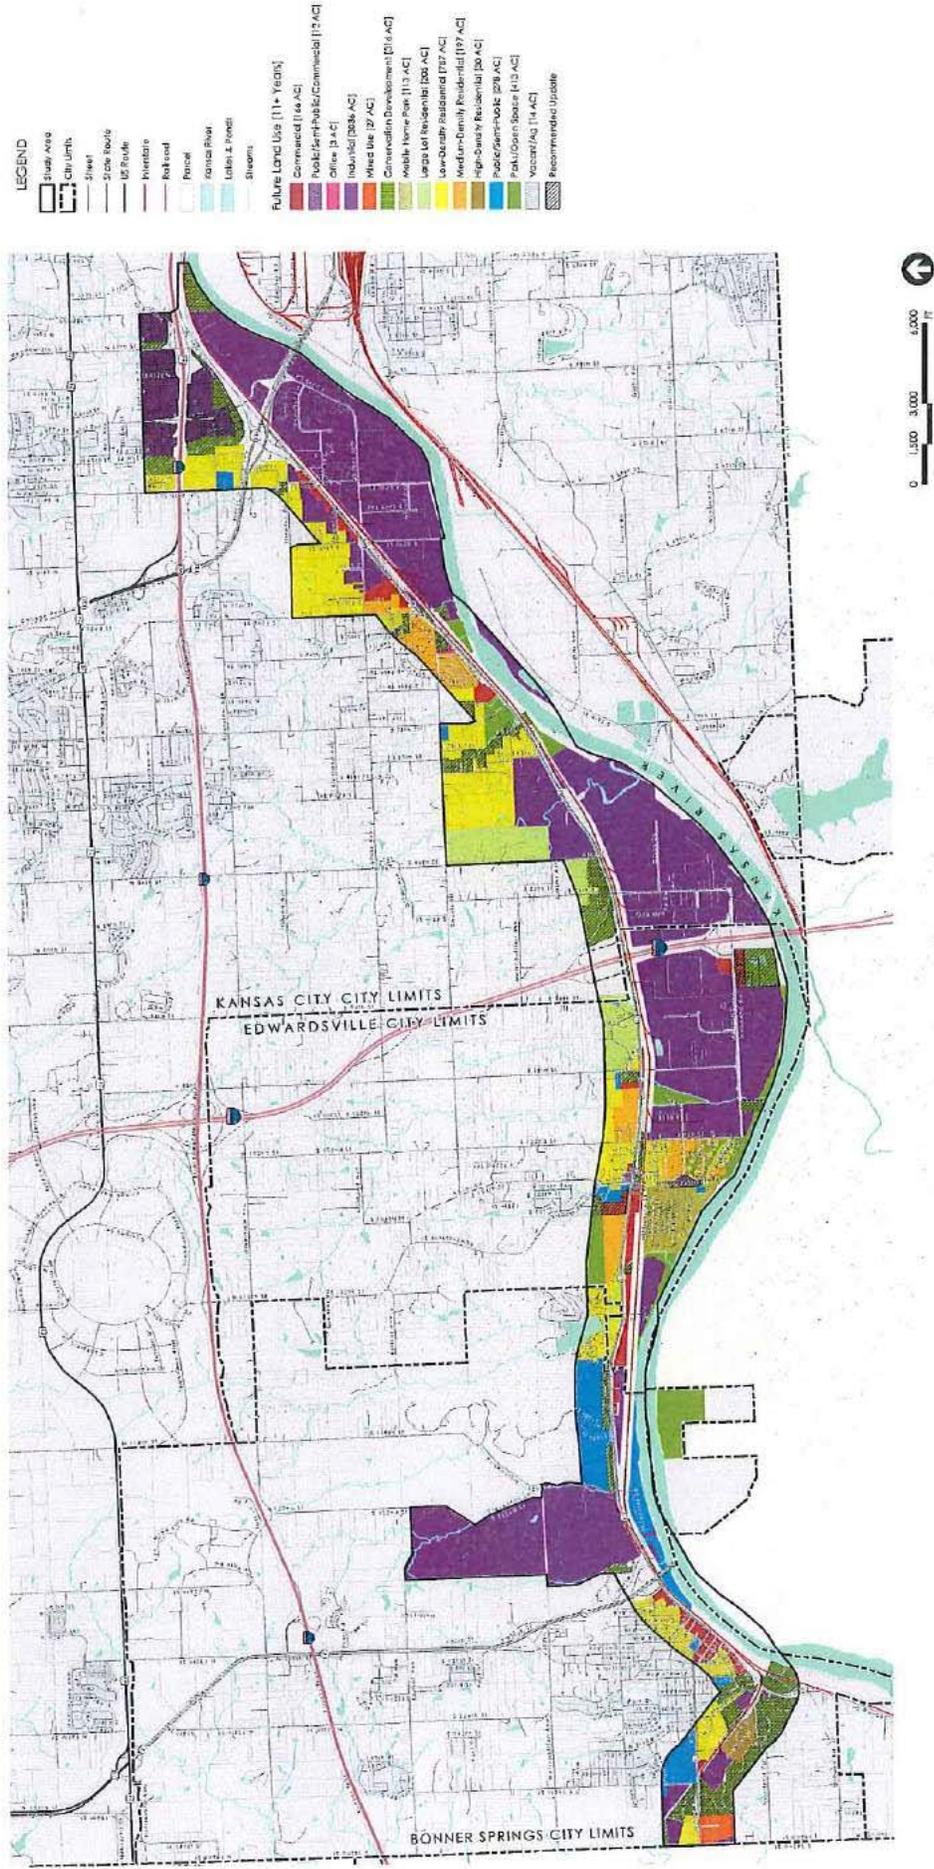

Recommendations

K-32 Tri-City Multimodal Redevelopment Plan  
**FUTURE LAND USE (1-10 Years with Recommended Updates)**

Recommendations

K-32 Tri-City Multimodal Redevelopment Plan  
**FUTURE LAND USE (11+ Years with Recommended Updates)**

## Recommendations

### Action Steps for Parks and Greenways

- Preserve and increase parks/open spaces to expand on the idea of "green" in the K-32 corridor; so it not only means jobs, but also recreation, and thereby draws new people to the area
- Encourage developers to pursue conservation development (residential and non-residential) options rather than conventional development techniques so additional parks/open space is provided within the corridor
- Market the economic benefits of conservation development, such as lower infrastructure and maintenance costs, greater residential appreciation values, and greater access to trails and greenways, versus conventional development approaches to prospective developers and future residents

### Action Steps for Infrastructure

- Minimize the impact of overhead utility lines within or adjacent to redevelopment projects
- Determine important locations for consolidating, burying, or relocating utility lines and poles, ensuring the locations consider targeted redevelopment areas
- Develop a plan for utility line consolidation
- Install curbs and gutters along K-32 where they do not currently exist to improve the appearance of the corridor

### Action Steps for Transportation

- Conduct a traffic study to forecast future traffic demand (vehicle, bicycle, pedestrian, and bus) and the corresponding number of travel lanes, ideal widths, and speed limits needed to safely accommodate all travelers along K-32; coordinate the study's results with the State's access management policies
- Strive to build transportation improvements within existing right-of-way limits and thereby reduce or eliminate property acquisition needs
- Repave K-32, install access control measures, and re-stripe it based on the warranted typical sections
- Ensure that key activity centers, such as Downtown Bonner Springs and Edwardsville, Grinter Museum, and employment areas, are accessible via a network of multiuse trails, greenways, on-street cycling provisions and/or transit
- Enhance multiuse trails by buffering them with green space, so eventually the "Kaw Valley Greenway" (or similarly name) system could be created
- Increase the number of Kansas River access points by exploring connections via K-7, 4th Street, 98th Street, and Mill Creek
- Expand transit service to the K-32 potential on-demand bus service area, providing connections to the Legends at Village West, the proposed Tiblow Multimodal Transit Hub, State Avenue transit route, the future Turner Commerce Center, and other employment areas
- Develop transit alternatives, such as carpooling, vanpooling, on-demand bus or shuttle service, Uber arrangements, and/or other options, to provide workers (who are within the K-32 potential demand response bus service area) with transportation to and from jobs within the corridor and to the proposed Turner Commerce Center
- Pair expanded transit service and transit alternatives with the timeframes assigned to first, second, and third shifts at major employment areas
- Explore a range of National Association of City Transportation Officials (NACTO) recommended bikeway facilities, including but not limited to two-way cycle tracks (two-way, one-side), for K-32 and apply the type most appropriate to the varied segments of the highway
- Consider the recommendations of the K-32 Railroad Quiet Zone Study

**Action Steps for Place-making**

- Allow the roadway width and amenities along K-32 to respond to the character of the land use and development adjacent to the route
- Improve K-32 by giving it the feel of a prairie-like "parkway" and include curbs and gutters, landscaped medians, tree-lined street edges, turn lanes, and lighting throughout
- Utilize an urbanized streetscape treatment inside the downtown areas that includes art, manicured trees and shrubs, pocket parks, benches, trash receptacles, and other items
- Provide a prairie-like landscape treatment outside of downtown areas that consists of taller, native trees, shrubs, and grasses
- Rename K-32 to "Kaw Valley Parkway" or something similar to begin to change the perception that the corridor is a higher speed corridor with few places to stop
- Develop a branding and way-finding system of identification signage, banners, colors, and more for the renamed K-32 that reflects its new name and the unique character of each of the Tri-Cities

*Sample Banner and Lighting (Not to Scale)*

### Action Steps for Environmental Conservation

- Conduct a Stream Asset Inventory to determine the quality of streams in the corridor and prioritize them
- Protect priority streams and adjacent wooded areas and steep slopes (15% or more) by buffering them with stream buffers
- Incorporate stormwater best management practices, such as vegetated swales, in small drainage areas that have low water runoff and concrete drainage ditches to help address areas with flooding issues

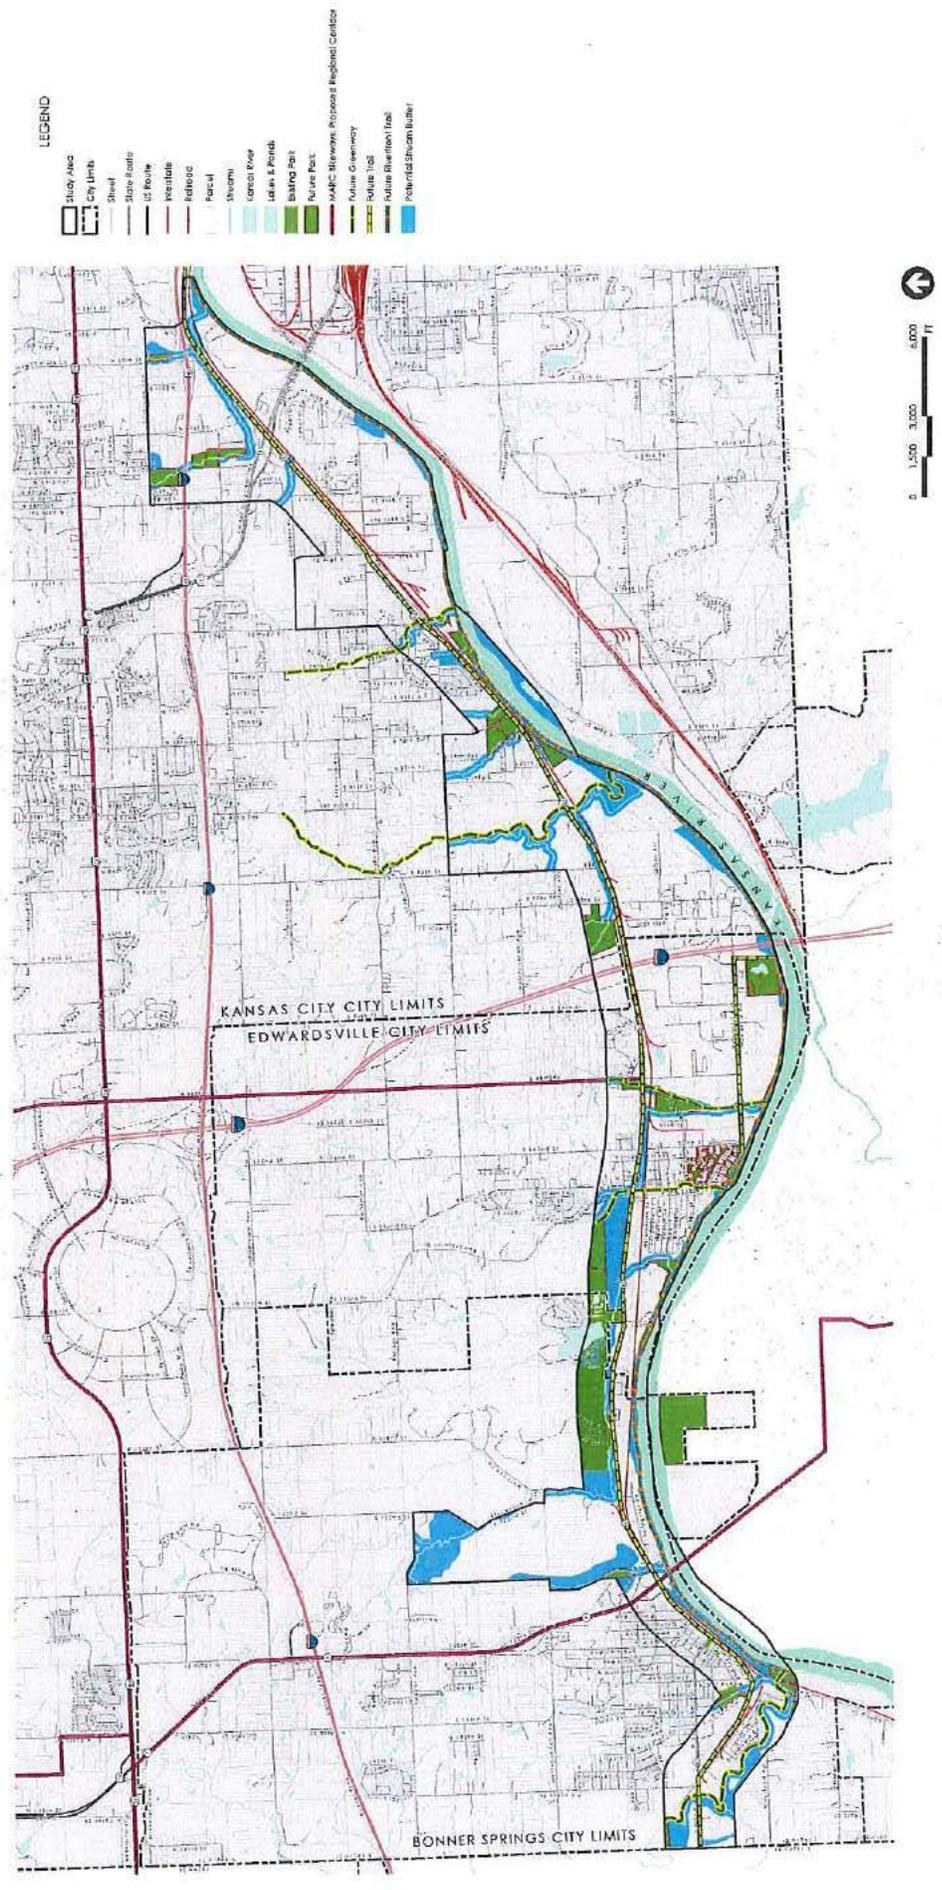

### Action Steps for Financing Improvements

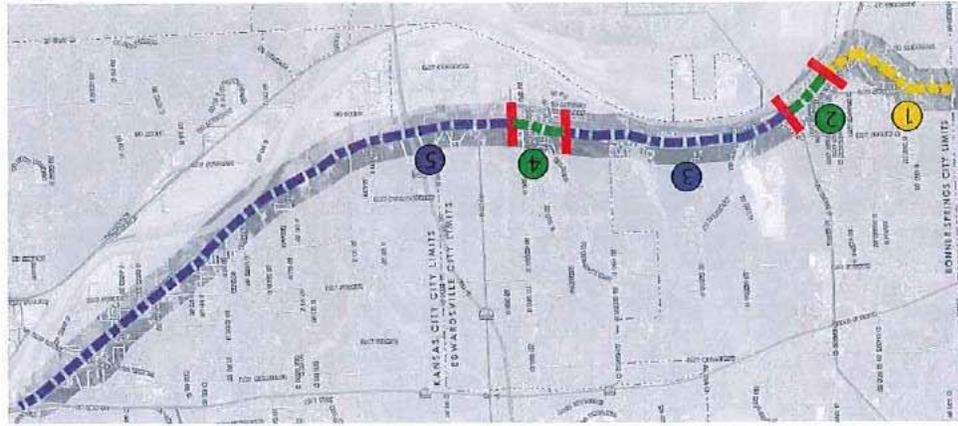

- Partner as "Tri-Cities" to pursue state and federal transportation funding for corridor-wide improvement projects
- Partner with adjacent municipalities, such as the City of Shawnee, to fund improvements that provide recreational amenities or connections that concern both communities
- Focus capital improvement efforts on priority activity centers, specifically K-32 in Historic Bonner Springs, near K-7, 4th Street, 78th Street, and the 65th Street/ Turner Diagonal areas
- Develop programs that provide grants to small businesses that may fit within recommended mixed use centers; grants would assist with start-up inventory, marketing, and other operating costs
- Explore opportunities to create small business incubator spaces and/or pop-up stores within recommended mixed use centers; either could become long-term tenants
- Make façade rebate programs available to local business owners who want to invest in façade, landscape, and/or lighting improvements for their properties
- Provide financial incentives, such as Tax Increment Financing (TIF), which can be used to fund land acquisition and relocation, public improvements (curbs, sidewalks, and streets), site preparation (demolition), and transit development, to spur the redevelopment of priority K-32 activity centers
- Include K-32 utility and stormwater projects within the capital improvement programs of each of the Tri-Cities
- Include projects for recommended K-32 off-street trails and on-street cycle routes within the capital improvement programs for the Tri-Cities as well as those for regional and state agencies
- Pursue state Transportation Alternatives (TA) Program dollars to fund K-32 facilities for pedestrians and bicycles, landscaping and scenic beautification, archaeological planning and research related to transportation, and the Safe Routes to School program
- Pursue Surface Transportation Program (STP) funding for either the construction of bicycle transportation facilities and pedestrian walkways, or non-construction projects (such as maps, brochures, and public service announcements) related to safe bicycle use and walking within the K-32 corridor
- Pursue Congestion Mitigation and Air Quality (CMAQ) Program funding for detailed planning, design, and construction of the "Kaw Valley Greenway system within the K-32 corridor
- Pursue Highway Safety Improvement Program (HSIP) funding for general transportation and bicycle/pedestrian safety projects, such as bike lanes, roadway shoulders, crosswalks, and other intersection improvements and signage
- Pursue State and Highway Safety Grant funding for bicycle and pedestrian safety programs as well as education, enforcement, and research programs intended to reduce traffic crashes, deaths, injuries, and property damage
- Partner with transit providers, such as Tiblow Transit and Kansas City Area Transportation Authority (KCATA), and major employers to create a Transportation Management Association (TMA) that can be leveraged to provide workers with transportation to job concentration areas
- Explore the possibility of expanding Ride KC: Bridj (on-demand shuttle service through KCATA) to the recommended K-32 potential on-demand transit service area
- Consider creating a Transportation Development District (TDD) to finance the costs of expanding transit service to the K-32 potential on-demand bus service area
- Consider a sales tax increase and/or a municipal utility fee to help fund the costs of providing transit service within the K-32 potential on-demand bus service area and thereby connect workers to key destinations, especially employment areas and downtowns
- Explore funding options, such as capital improvement program allocations, for the projects recommended in the K-32 Railroad Quiet Zone Study

# BONNER SPRINGS

## Tiblow Multimodal Transit Hub

Developing a "historic" feeling multimodal transportation hub in close proximity to downtown would reflect the area's historic context, complement the City's efforts to improve the look and feel of the area, and enhance strategies for drawing economic development downtown. Creating the Tiblow Multimodal Transit Hub would require a series of land use, transportation, and place-making steps.

### Historic Downtown Bonner Springs "Before"

### Historic Downtown Bonner Springs "After"

### Action Steps for Land Use

- Maintain Kelly Murphy Park as an amenity that is accessible from the transit hub
- Replace existing strip commercial development with a series of mixed use buildings that combine ground floor retail with second and/or third floor residential units
- Attract a small grocery store or market that could locate within one of the new mixed use buildings
- Relocate the Tiblow Transit Headquarters to the site and include office and residential uses within the building
- Allow unoccupied surface parking to serve as farmers market locations that provide community members with additional access to fresh food choices
- Coordinate with developers to 1) donate right-of-way for planned amenity zones and wider sidewalks that support both pedestrian traffic and outdoor eating opportunities; or 2) incorporate the aforementioned features into the development plan

## Action Steps for Transportation

- Ensure a range of parking options, including surface parking behind buildings, bike racks in front of buildings, and/or other parking options is provided
- Provide pedestrian access through the site, including between buildings
- Include a transit stop and route bus service so it travels along K-32 and through the newly created transit hub
- Explore multimodal, roadway cross-sections via traffic and access management studies that consider future redevelopment plans for the area between Oak Street and the K-7 Interchange
- Explore opportunities to provide more than one type of roadway cross-section between Oak Street and the K-7 Interchange
- Provide a combination of barrier-separated on-street cycling and off-street pedestrian paths
- Construct intersection crosswalks with patterned concrete so motorists recognize them as important pedestrian areas

The City of Bonner Springs envisions providing multimodal transportation options in its downtown area. However, right-of-way is limited, especially between Oak Street and Warner Street. Typical sections that involve additional turning opportunities, planted amenities, and wider sidewalks will require the purchase of right-of-way from adjacent property owners or the donation of the same to the City. The City should conduct traffic and access management studies to determine the safest multimodal roadway configuration(s) for the area considering future redevelopment plans.

## Action Steps for Place-making

- Place mixed use buildings of up to three floors in height close to the street edges of K-32 to further define Historic Downtown Bonner Springs' urban form and make them more accessible to pedestrian and bicycle traffic
- Locate the new transit facility close to the street edge to make it more accessible to pedestrians and bicyclists
- Use masonry building materials and colors that complement those elsewhere downtown
- Utilize building designs that include ample glass to maximize the visibility of people
- Include a wide sidewalk on the north side of K-32 that abuts new mixed buildings, so sidewalk café options could be created
- Include street art, trees, flower beds, and pocket parks

## K-7 INTERCHANGE - Shopping Area

Revitalizing the strip shopping area on the north side of K-32 (west of the K-7 Interchange) would expand the shopping and restaurant options available for Bonner Springs residents and visitors. Implementing the change would involve several land use, transportation, and place-making action steps.

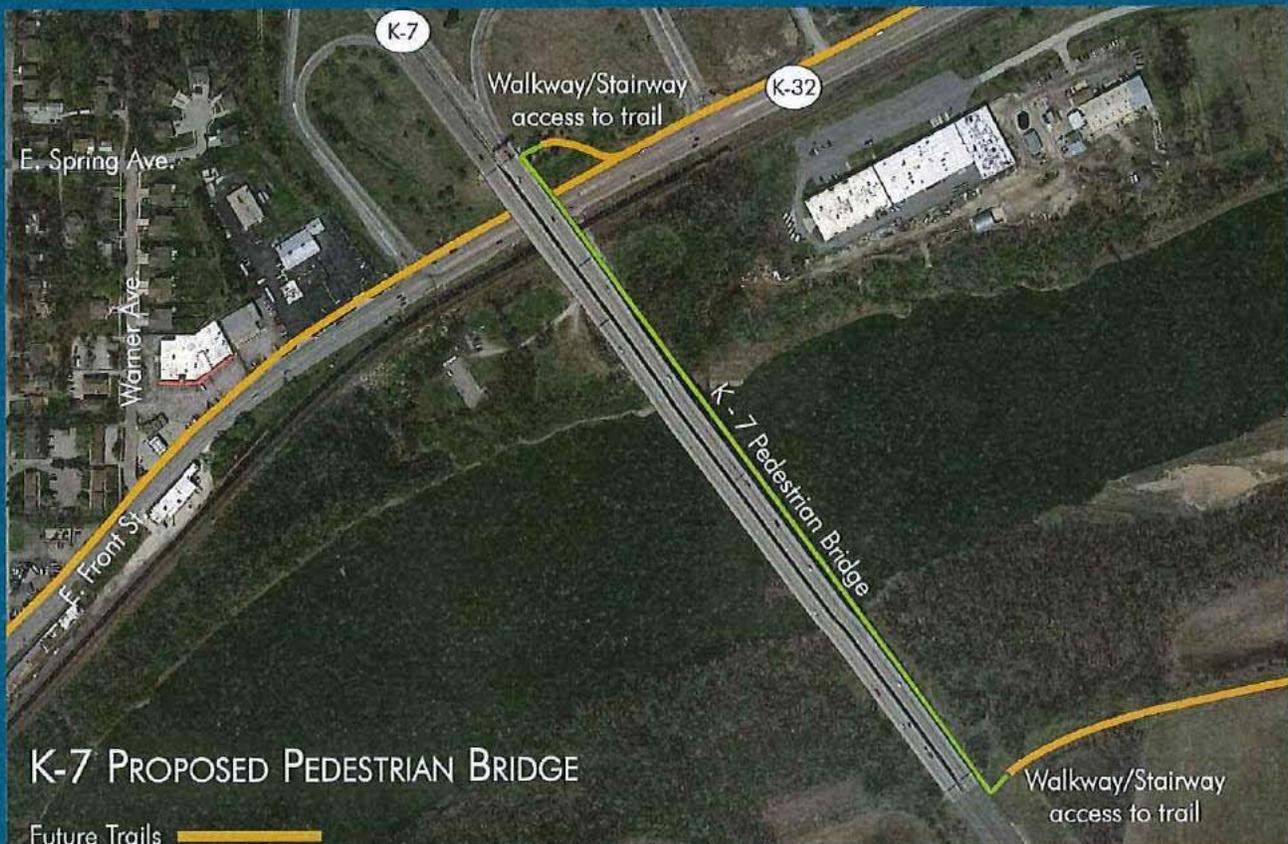

### Action Steps for Land Use

- Redevelop the existing strip commercial center on the north side of K-32 with mixed uses (residential and retail) that are organized in buildings that include two to three floors
- Redevelop the east side of Warner Street to redevelop with additional mixed use (residential and retail) development in buildings of two to three floors
- Encourage the development of a small or quick-service restaurant at the northeast corner of K-32 and Warner Street

### Action Steps for Transportation

- Provide a range of parking options, including surface parking behind buildings, bike racks in front of buildings, and/or other parking options
- Provide pedestrian access through the recommended redevelopment sites, including between buildings
- Continue exploring roadway typical cross-sections that consider future redevelopment plans for the area between Oak Street and the K-7 Interchange
- Incorporate a transit stop into the development plan for the K-7 shopping area to serve mixed use centers and nearby housing
- Provide a pedestrian bridge over the Kansas River via K-7 that connects the proposed trails on K-32 and the south side of the river

### K-7 Proposed Pedestrian Bridge

K-7 Interchange Shopping Area "Before"

**Action Steps for Place-making**

- Place mixed use buildings of up to three floors in height close to the street edges of K-32 to further define Downtown Bonner Springs' urban form and make them more accessible to pedestrian and bicycle traffic
- Use masonry building materials and colors that complement those elsewhere downtown
- Support building designs that use ample glass to maximize the visibility of people
- Include a wide sidewalk on the north side of K-32 that abuts new mixed buildings, so sidewalk café options could be created
- Include street art, trees, flower beds, and pocket parks
- Connects nearby retail/residential developments with one another via civic plaza space

K-7 Interchange Shopping Area "After"

## EDWARDSVILLE - 4th Street Development Plan - Phase 1 of 2

Moving some of the services currently available at 4th Street and Blake north to K-32 affords the opportunity to develop a mixed-use center that offers both government and retail services in a prominent location along the corridor. The shift would be part of a dual-phase development plan involving several land use, transportation, and place-making steps.

### Action Steps for Land Use

- Develop the vacant corner of K-32 at 4th Street with a mixed use building that offers government/retail services, such as post office needs, city hall functions, and small retail services, on the first floor and residential units on the second floor
- Replace the existing post office at the southwest corner of K-32 and 4th Street with mixed use buildings that provide ground floor retail with residential above
- Develop a small (20,000 to 24,000 square foot) grocery store on the vacant ground east of the existing Dollar General store
- Create parks/open space at the southeast corner of K-32 at 4th Street
- Encourage the development additional retail at the southeast corner of K-32 at 4th Street

### Action Steps for Transportation

- Strive to maintain a multimodal, five-lane roadway section in the vicinity of 4th Street
- Provide an on-street cycling path on the north side of K-32
- Provide sidewalks on both the north and south sides of K-32 to connect pedestrians to nearby destinations
- Provide sidewalks on 4th Street to safely connect residents to Edwardsville Elementary School and destinations south of K-32
- Construct intersection crosswalks with patterned concrete so motorists recognize them as important pedestrian areas
- Reduce the speed limit to 35 mph in consideration of development and corresponding bicycle/pedestrian movements in all directions of the improved K-32 and 4th Street intersection

### K-32 at 4th Street "After" (looking east on K-32)

K-32 at 4th Street "Before"

**Action Steps for Place-making**

- Place mixed use buildings close to the street edges of 4th Street and K-32 to further define Downtown Edwardsville's urban form and make them more accessible to pedestrian and bicycle traffic
- Place parking to side or rear of buildings rather than in the front and opposite K-32
- Utilize building designs that include ample glass to maximize the visibility of people
- Install trees and other landscaping within the proposed median and on the north and south sides of K-32 to create a tunnel effect for drivers that contributes to their driving more slowly through the 4th Street portion of the corridor

K-32 at 4th Street "After"

## EDWARDSVILLE - 4th Street Development Plan - Phase 2 of 2

Moving some of the services currently available at 4th Street and Blake north to K-32 affords the opportunity to develop a mixed-use center that offers both government and retail services in a prominent location along the corridor. The shift would be part of a dual-phase development plan involving several land use, transportation, and place-making steps.

### Action Steps for Land Use

- Encourage the north side of K-32 to develop with small retail nodes
- Support retail with higher density residential development (town homes, apartments) that front K-32 while low density residential uses (single-family homes) occupy the remaining area
- Develop mixed use and additional retail on the south side of K-32

### Action Steps for Transportation

- Construct a reverse frontage road on the north side of K-32 between 2nd and 4th Streets
- Construct a reverse frontage road on the south side of K-32 between 2nd and 4th Streets
- Construct a north-south collector streets between 2nd and 4th Streets that connect frontage roads to K-32

- Incorporate bicycle/pedestrian facilities into frontage roads and collector streets
- Construct intersection crosswalks with patterned concrete so motorists recognize them as important pedestrian areas
- Limit direct vehicular access for new development to frontage roads
- Incorporate a transit stop into the 4th Street development plan to serve mixed use centers and housing areas

### Action Steps for Place-making

- Continue the place-making action steps described with Phase I of the 4th Street Development Plan
- Allow unoccupied parking areas to serve as alternate locations for farmers markets to increase community access to fresh food

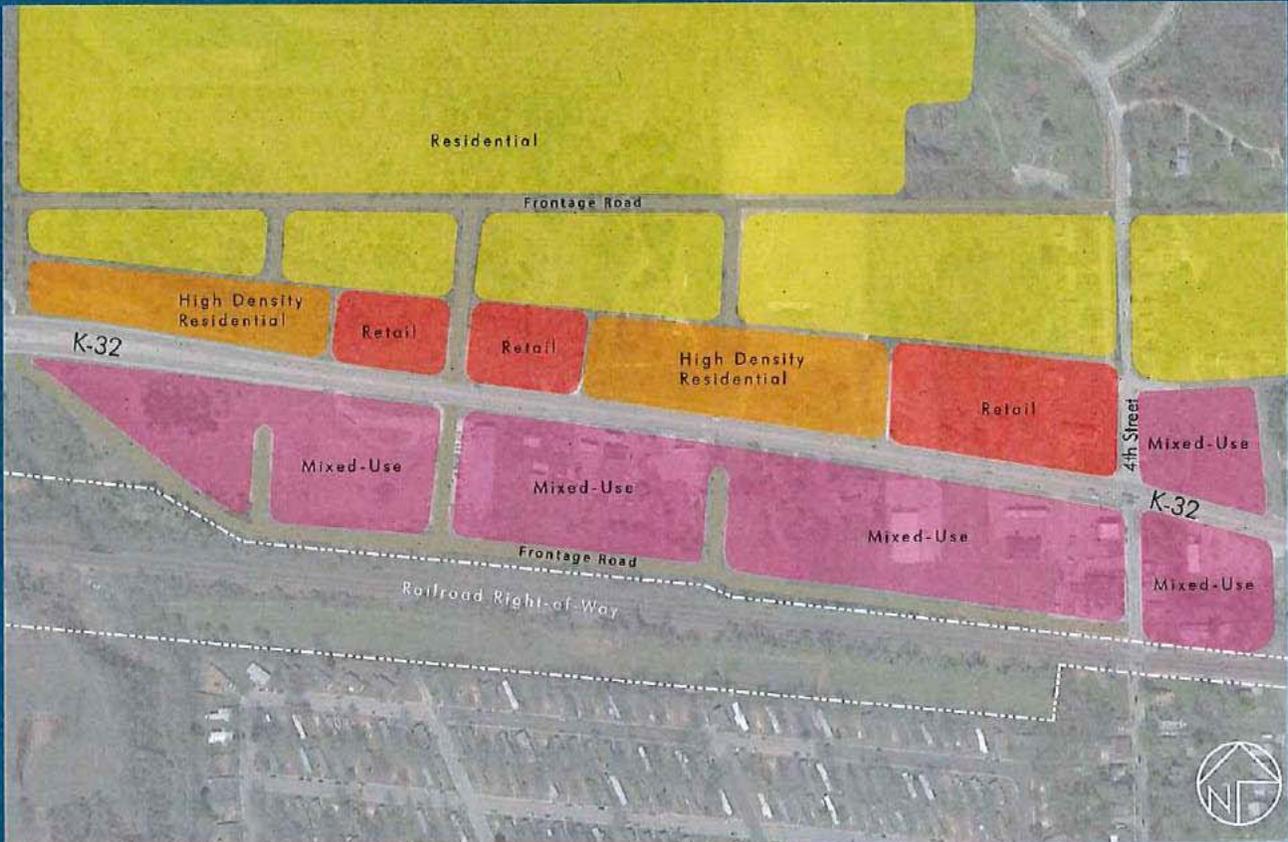

### K-32 at 4th Street "After"

K-32 at 4th Street "Before"

K-32 at 4th Street "After"

## KANSAS CITY - Grinter Place Restaurant/Entertainment

Enhancing the Grinter Historic Site by developing a restaurant/entertainment venue on the undeveloped property located on the north side of K-32 just east of 78th Street would both complement the Grinter Museum and increase its ability to draw visitors to the site. The effort would involve a series of land use, transportation, and place-making actions steps.

### Action Steps for Land Use

- Develop the site with a combination retail, restaurant (farm-to-table or alternative variation), and entertainment venue
- Preserve portions of the site as open space that serves recreational purposes

### Action Steps for Transportation

- Link the newly created retail/restaurant/entertainment venue to Grinter Museum via multiuse path
- Provide a meandering pedestrian path on site to enhance on-site recreational opportunities and connect it to the large multiuse path that links to the museum

- Provide direct vehicular access from K-32
- Include a transit stop near 78th and K-32 to improve visitor access the site
- Apply the recommendations of the KDOT Traffic Investigation Report for K-32 at 78th Street (see the appendix) and thereby address the crash history at the intersection by 1) including an eastbound left turn lane and a westbound right turn lane, and 2) considering partially closing the 78th Street access and relocating the left turning movements to the 79th Street intersection
- Conduct a traffic study to determine if a traffic signal is warranted on K-32 at 78th Street due to the additional traffic the new venue may generate

### K-32 at Grinter "After"

K-32 at Grinter "Before"

**Action Steps for Place-making**

- Allow for the development of a two-story building that includes plaza space and can accommodate outdoor dining, entertainment /performance, or gathering space
- Utilize masonry building materials and colors that complement those in use on the Grinter property
- Position parking to the rear of the building

K-32 at Grinter "After"

## KANSAS CITY - 65th Street/Turner Diagonal Development Plan

Reimagining the industrial area south of K-32 generally from 72nd Street to 57th Street as a industrial park that focuses on green industry, green building design, and green infrastructure would further the aspiration of attracting employers to the corridor who would employ local residents and provide job training programs. The project would involve a range of land use, transportation, and place-making actions steps

### Action Steps for Land Use

- Consolidate industrial uses into target areas
- Consider relocating higher density residential uses to alternative locations within the K-32 study area

### Action Steps for Transportation

- Streamline interior roadway circulation and manage access to more efficiently serve business and industrial park development along with the truck traffic it generates
- Provide transit stops and/or vanpooling locations to help job seekers outside corridor reach it from places near I-70, such as the Legends at Village West and the proposed Turner Diagonal Business Park

### Action Steps for Place-making

- Explore Leadership in Energy and Environmental Design (LEED) principles of building design, construction, operations and maintenance, and/or interior design with developers
- Encourage developer pursuit of LEED certification and reference the LEED New Construction and Major Renovation checklist for projects seeking LEED credits for location and transportation, sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and regional priority ([usgbc.org](http://usgbc.org))
- Use stormwater water best management practices, such as native vegetation swales, to address silt and erosion control issues

## IMPLEMENTATION

*Recommended action steps for implementing the K-32 Tri-City Multimodal Redevelopment Plan are summarized within the implementation matrix on pages in this section. The matrix describes both corridor-wide and community-specific actions. It also suggests implementation responsibility and timing as follows:*

### Responsibility

**City:** City of Bonner Springs, Edwardsville, and/or the Unified Government of Wyandotte County-Kansas City, Kansas

**Agency:** KDOT, MARC, KCATA, economic development groups, and others

**Private Sector:** Private individuals or groups, including developers

**Area Businesses:** Tri-City businesses

### Timing

**Short-term:** Years 1 - 5

**Medium-term:** Years 6 - 10

**Long-term:** Years 11+

**On-going**

## CORRIDOR WIDE

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>REDEVELOPMENT</b>									
a	Target redevelopment activities to top priority activity centers	X	X						X
b	Establish public-private partnerships to achieve desired land use and development outcomes	X	X	X					X
c	Support industrial expansion in south Wyandotte County	X		X					X
d	Encourage the continued development of the K-32 corridor as an employment center that draws workers from beyond the planning area to train for and obtain jobs at K-32's green industries and business parks	X	X						X
e	Incentivize the development of green industries within the K-32 corridor that provide job training, employ a large percentage of local workers, and pay higher wages	X	X						X
f	Combine industrial investment with compatible investments in human capital, providing workers with a combination of job training and on-the-job training	X	X	X	X	X			
g	Explore the connections between green industry and health and wellness, leveraging them to promote the development of K-32 as a "green" corridor	X	X			X			
h	Encourage redevelopment efforts that will help the K-32 corridor reach the population and employment densities necessary to support on-demand transit service	X	X						X
i	Conduct a market study to define the capacity and potential for retail/service and entertainment development in the corridor	X				X			
j	Increase housing diversity (type, location, and cost) to attract young families and professionals to the corridor and encourage older residents to age in place	X							X

CORRIDOR WIDE

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>PARKS AND GREENWAYS</b>									
a	Preserve and increase parks/open spaces to expand on the idea of "green" in the K-32 corridor, so it not only means jobs, but also recreation	X							X
b	Encourage developers to pursue conservation development (residential and non-residential) options rather than conventional development techniques so additional parks/open space is provided	X	X						X
c	Market the economic benefits of conservation development versus conventional development approaches to prospective developers and future residents	X	X						X
<b>TRANSPORTATION</b>									
a	Conduct a traffic study to forecast future traffic demand (vehicle, bicycle, pedestrian, and transit) and the corresponding number of travel lanes, bike/pedestrian facility types, ideal widths, and speed limits needed to accommodate all travelers along K-32 safely; coordinate the study's results with the State's access management policies	X	X			X			
b	Strive to build transportation improvements within existing right-of-way limits	X	X						X
c	Repave K-32, install access control measures, and re-stripe it based on the warranted typical sections	X	X				X		
d	Ensure that key activity centers are accessible via a network of multiuse trails, greenways, on-street cycling provisions and/or transit	X	X						X
e	Enhance multiuse trails by buffering them with green space, so eventually the "Kaw Valley Greenway" system could be created	X							X

## CORRIDOR WIDE

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>TRANSPORTATION (CONT.)</b>									
f	Increase the number of Kansas River access points	X	X						X
g	Expand transit service to the K-32 potential bus service area	X	X	X	X				X
h	Develop transit alternatives to provide workers with transportation to and from jobs within the corridor and to the proposed Turner Commerce Center	X	X	X	X				X
i	Pair expanded transit service and transit alternatives to the timeframes assigned to first, second, and third shifts at major employment areas	X	X	X	X				X
j	Explore a range of National Association of City Transportation Officials (NACTO) recommended bikeway facilities for K-32 and apply the type most appropriate to the varied segments of the highway	X	X						X
k	Consider the recommendations of the K-32 Railroad Quiet Zone Study	X	X						X
<b>INFRASTRUCTURE</b>									
a	Minimize the impact of overhead utility lines within or adjacent to redevelopment projects	X	X				X		
b	Determine important locations for consolidating, burying, or relocating utility lines and poles, ensuring the locations consider targeted redevelopment areas	X	X	X			X		
c	Develop a plan for utility line consolidation	X	X	X			X		
d	Install curbs and gutters along K-32 where they do not currently exist to improve the appearance of the corridor	X	X				X		

CORRIDOR WIDE

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>PLACE-MAKING</b>									
a	Allow the roadway width and amenities along K-32 to respond to the character of the land use and development adjacent to the route	X	X						X
b	Improve K-32 by giving it the feel of a prairie-like "parkway" and include curbs and gutters, landscaped medians, tree-lined street edges, turn lanes, and lighting throughout	X	X				X		
c	Utilize an urbanized streetscape treatment inside the downtown areas that includes art, manicured trees and shrubs, pocket parks, benches, trash receptacles, and other items	X		X			X		
d	Provide a prairie-like landscape treatment outside of downtown areas that consists of taller, native trees, shrubs, and grasses	X					X		
e	Rename K-32 to "Kaw Valley Parkway" or something similar	X	X				X		
f	Develop a branding and way-finding system for K-32 that reflects its new name and the unique character of each of the Tri-Cities	X	X	X	X			X	
g	Develop a marketing strategy for the corridor	X	X	X	X			X	
<b>ENVIRONMENTAL CONSERVATION</b>									
a	Conduct a Stream Asset Inventory to determine the quality of streams in the corridor and prioritize them	X				X			
b	Protect priority streams and adjacent wooded areas and steep slopes (15% or more) with stream buffers	X							X
c	Incorporate stormwater best management practices in small drainage areas that have low water runoff and concrete drainage ditches	X	X	X	X				X

## CORRIDOR WIDE

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>FINANCING IMPROVEMENTS</b>									
a	Partner as "Tri-Cities" to pursue state and federal transportation funding for corridor-wide improvement projects	X	X	X	X				X
b	Partner with adjacent municipalities to fund improvements that provide recreational amenities or connections that concern both communities	X							X
c	Focus capital improvement efforts on priority activity centers	X	X						X
d	Develop programs that provide grants to small businesses that may fit within recommended mixed use centers	X							X
e	Explore opportunities to create small business incubator spaces and/or pop-up stores within recommended mixed use centers	X	X						X
f	Make façade rebate programs available to local business owners	X	X						X
g	Provide financial incentives to spur the redevelopment of priority K-32 activity centers	X	X						X
h	Pursue Congestion Mitigation and Air Quality (CMAQ) Program funding for detailed planning, design, and construction of the "Kaw Valley Greenway" system within the K-32 corridor	X	X	X	X				X
i	Pursue Highway Safety Improvement Program (HSIP) funding for general transportation and bicycle/pedestrian safety projects, other intersection improvements, and signage	X	X	X	X				X
j	Pursue State and Highway Safety Grant funding for bicycle and pedestrian safety, education, enforcement, and research programs intended to reduce traffic crashes, deaths, injuries, and property damage	X	X	X	X				X

CORRIDOR WIDE

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>FINANCING IMPROVEMENTS (CONT.)</b>									
k	Partner with transit providers and major employers to create a Transportation Management Association (TMA) that can be leveraged to provide workers with transportation to job concentration areas	X	X	X	X				X
l	Explore the possibility of expanding Ride KC: Bridj to the recommended K-32 potential on-demand transit service area	X	X	X					X
m	Consider creating a Transportation Development District (TDD) to finance the costs of expanding transit service to the K-32 potential on-demand bus service area	X	X						X
n	Consider a sales tax increase and/or a municipal utility fee to help fund the costs of providing transit service within the K-32 potential on-demand bus service area	X	X						X
o	Explore funding options for the projects recommended in the K-32 Railroad Quiet Zone Study	X	X						X

## BONNER SPRINGS TIBLOW MULTIMODAL TRANSIT HUB

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>LAND USE</b>									
a	Maintain Kelly Murphy Park as an amenity that is accessible from the transit hub	X					X		
b	Replace existing strip commercial development with a series of mixed use buildings that combine ground floor retail with second and/or third floor residential units	X	X	X			X		
c	Attract a small grocery store or market that could locate within one of the new mixed use buildings	X		X			X		
d	Relocate the Tiblow Transit Headquarters to the site and include office and residential uses within the building	X		X			X		
e	Allow unoccupied surface parking to serve as farmers market locations that provide community members with additional access to fresh food choices	X			X		X		
f	Coordinate with developers to 1) donate right-of-way for planned amenity zones and wider sidewalks that support both pedestrian traffic and outdoor eating opportunities; or 2) incorporate the aforementioned features into the development plan	X	X	X			X		
<b>TRANSPORTATION</b>									
a	Ensure a range of parking options, including surface parking behind buildings, bike racks in front of buildings, and/or other parking options, is provided	X					X		
b	Provide pedestrian access through the site, including between buildings	X		X			X		
c	Include a transit stop and route bus service so it travels along K-32 and through the newly created transit hub	X		X			X		
d	Explore multimodal, roadway cross-sections via traffic and access management studies that consider future redevelopment plans for the area between Oak Street and the K-7 Interchange	X	X				X		

**BONNER SPRINGS  
TIBLOW MULTIMODAL TRANSIT HUB**

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>TRANSPORTATION (CONT.)</b>									
e	Explore opportunities to provide more than one type of roadway cross-section between Oak Street and the K-7 Interchange	X	X				X		
f	Provide a combination of barrier-separated on-street cycling and off-street pedestrian paths	X	X				X		
g	Construct intersection crosswalks with patterned concrete so motorists recognize them as important pedestrian areas	X	X				X		
<b>PLACE-MAKING</b>									
a	Place mixed use buildings of up to three floors in height close to the street edges of K-32 to further define Historic Downtown Bonner Springs' urban form and make them more accessible to pedestrian and bicycle traffic	X		X			X		
b	Locate the new transit facility close to the street edge to make it more accessible to pedestrians and bicyclists	X					X		
c	Use masonry building materials and colors that complement those elsewhere downtown	X		X			X		
d	Utilize building designs that include ample glass to maximize the visibility of people	X		X			X		
e	Include a wide sidewalk on the north side of K-32 that abuts new mixed buildings, so sidewalk café options could be created	X		X			X		
f	Include street art, trees, flower beds, and pocket parks	X		X	X		X		

**BONNER SPRINGS  
K-7 INTERCHANGE SHOPPING AREA**

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>LAND USE</b>									
a	Redevelop the existing strip commercial center on the north side of K-32 with mixed uses	X		X				X	
b	Redevelop the east side of Warner Street to redevelop with additional mixed use development	X		X				X	
c	Encourage the development of a small or quick-service restaurant at the northeast corner of K-32 and Warner Street	X		X				X	
<b>TRANSPORTATION</b>									
a	Provide a range of parking options, including surface parking behind buildings, bike racks in front of buildings, and/or other parking options	X		X				X	
b	Provide pedestrian access through the recommended redevelopment sites, including between buildings	X		X				X	
c	Continue exploring roadway typical cross-sections that consider future redevelopment plans for the area	X	X					X	
d	Incorporate a transit stop into the development plan for the K-7 shopping area to serve mixed use centers and nearby housing	X	X	X				X	
e	Provide access over the Kansas River via a multiuse trail across the K-7 Bridge	X	X					X	

**BONNER SPRINGS  
K-7 INTERCHANGE SHOPPING AREA**

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>PLACE-MAKING</b>									
a	Place mixed use buildings of up to three floors in height close to the street edges of K-32 to further define Downtown Bonner Springs' urban form and make them more accessible to pedestrian and bicycle traffic	X		X				X	
b	Use masonry building materials and colors that complement those elsewhere downtown	X		X				X	
c	Support building designs that use ample glass to maximize the visibility of people	X		X	X			X	
d	Include a wide sidewalk on the north side of K-32 that abuts new mixed buildings, so sidewalk café options could be created	X		X				X	
e	Include street art, trees, flower beds, and pocket parks	X		X	X			X	
f	Connect nearby retail/residential developments with one another via civic plaza space	X		X				X	

**EDWARDSVILLE  
4TH STREET DEVELOPMENT PLAN - PHASE I OF 2**

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>LAND USE</b>									
a	Develop the vacant corner of K-32 at 4th Street with a mixed use building that offers government/retail services, such as post office needs, city hall functions, and small retail services, on the first floor and residential units on the second floor	X	X	X			X		
b	Replace the existing post office at the southwest corner of K-32 and 4th Street with mixed use buildings that provide ground floor retail with residential above	X	X	X			X		
c	Develop a small (20,000 to 24,000 square foot) grocery store on the vacant ground east of the existing Dollar General store	X	X	X			X		
d	Create parks/open space at the southeast corner of K-32 at 4th Street	X					X		
e	Encourage the development additional retail at the southeast corner of K-32 at 4th Street	X					X		
<b>TRANSPORTATION</b>									
a	Strive to maintain a multimodal, five-lane roadway section in the vicinity of 4th Street	X	X				X		
b	Provide an on-street cycling path on the north side of K-32	X	X				X		
c	Provide sidewalks on both the north and south sides of K-32 to connect pedestrians to nearby destinations	X	X				X		
d	Provide sidewalks on 4th Street to safely connect residents to Edwardsville Elementary School and destinations south of K-32	X	X				X		
e	Construct intersection crosswalks with patterned concrete so motorists recognize them as important pedestrian areas	X	X				X		
f	Reduce the speed limit to 35 mph in consideration of development and corresponding bicycle/pedestrian movements in all directions of the improved K-32 and 4th Street intersection	X	X				X		

EDWARDSVILLE  
4TH STREET DEVELOPMENT PLAN - PHASE I OF 2

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Me- dium	Long	On- going
<b>PLACE-MAKING</b>									
a	Place mixed use buildings close to the street edges of 4th Street and K-32 to further define Downtown Edwardsville's urban form and make them more accessible to pedestrian and bicycle traffic	X		X			X		
b	Place parking to the side or rear of buildings rather than in the front and opposite K-32	X		X			X		
c	Utilize building designs that include ample glass to maximize the visibility of people	X		X			X		
d	Install trees and other landscaping within the proposed median and on the north and south sides of K-32 to create a tunnel effect for drivers that contributes to their driving more slowly through the 4th Street portion of the corridor	X	X	X			X		

EDWARDSVILLE

4TH STREET DEVELOPMENT PLAN – PHASE 2 OF 2

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>LAND USE</b>									
a	Encourage the north side of K-32 to develop with small retail nodes	X		X				X	
b	Support retail with higher density residential development (town homes, apartments) that front K-32 while low density residential use occupy the remaining area	X		X				X	
c	Develop mixed use and additional retail on the south side of K-32	X		X				X	
<b>TRANSPORTATION</b>									
a	Construct a reverse frontage road on the north side of K-32 between 2nd and 4th Streets	X	X					X	
b	Construct a reverse frontage road on the south side of K-32 between 2nd and 4th Streets	X	X					X	
c	Construct a north-south collector streets between 2nd and 4th Streets that connect frontage roads to K-32	X	X					X	
d	Incorporate bicycle/pedestrian facilities into frontage roads and collector streets	X	X					X	
e	Construct intersection crosswalks with patterned concrete so motorists recognize them as important pedestrian areas	X	X					X	
f	Limit direct vehicular access for new development to frontage roads	X	X					X	
g	Incorporate a transit stop into the 4th Street development plan to serve mixed use centers and housing areas	X	X					X	
<b>PLACE-MAKING</b>									
a	Continue the place-making action steps described with Phase 1 of the 4th Street Development Plan	X	X	X				X	
b	Allow unoccupied parking areas to serve as alternate locations for farmers markets to increase community access to fresh foods	X		X				X	

KANSAS CITY  
GRINTER PLACE ENHANCEMENT

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>LAND USE</b>									
a	Develop the site with a combination retail, restaurant, and entertainment venue	X	X	X			X		
b	Preserve portions of the site as open space that serves recreational purposes	X	X	X			X		
<b>TRANSPORTATION</b>									
a	Link the newly created retail/restaurant/entertainment venue to Grinter Museum via multiuse path	X	X	X			X		
b	Provide a meandering pedestrian path on site to enhance on-site recreational opportunities and connect it to the large multiuse path that links to the museum	X		X			X		
c	Provide direct vehicular access from K-32	X	X	X			X		
d	Include a transit stop near 78th and K-32 to improve visitor access the site	X	X	X			X		
e	Apply the recommendations of the KDOT Traffic Investigation Report for K-32 at 78th Street and thereby address the crash history at the intersection by adding a turn lanes and or relocating turning movements	X	X	X			X		
f	Conduct traffic and access management studies to determine if turn lanes and a traffic signal are warranted for K-32 at 78th Street due to the additional traffic the new venue may generate	X	X	X			X		
<b>PLACE-MAKING</b>									
a	Allow for the development of a two-story building that includes plaza space and can accommodate outdoor dining, entertainment/performance, or gathering space	X		X			X		
b	Utilize masonry building materials and colors that complement those in use on the Grinter property			X			X		
c	Position parking to the rear of the building			X			X		

**KANSAS CITY  
65TH AND TURNER DIAGONAL DEVELOPMENT PLAN**

Action Steps		Responsibility				Timing			
		City	Agency	Private Sector	Area businesses	Short	Medium	Long	On-going
<b>LAND USE</b>									
a	Consolidate industrial uses to target sites	X	X	X				X	
b	Consider relocating higher density residential uses to other locations within the K-32 study area	X	X	X				X	
<b>TRANSPORTATION</b>									
a	Streamline interior roadway circulation and manage access to more efficiently serve business and industrial park development along with the truck traffic it generates	X		X				X	
b	Provide transit stops and/or vanpooling locations to help job seekers outside corridor reach it from places near I-70, such as the Legends at Village West and the proposed Turner Diagonal Business Park in Kansas City, Kansas	X	X	X				X	
<b>PLACE-MAKING</b>									
a	Explore Leadership in Energy and Environmental Design (LEED) principles of building design, construction, operations and maintenance, and/or interior design with developers	X		X	X			X	
b	Encourage developer pursuit of LEED certification and reference the LEED New Construction and Major Renovation checklist for projects seeking LEED credits	X						X	
e	Use stormwater water best management practices, such as native vegetation swales, to address silt and erosion control issues	X	X	X	X			X	

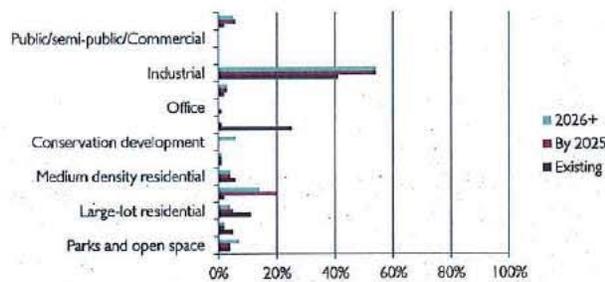

## ANTICIPATED OUTCOMES

*The planning team combined Geographic Information Systems analysis and MARC's Envision Tomorrow data to develop a range of anticipated outcomes for the land use, development, and transportation strategies recommend for the K-32 corridor. All assume that the vision is realized fully.*

## Land Use Mix

Industry will continue to occupy more parcels in the K-32 corridor than any other type of land use and development.

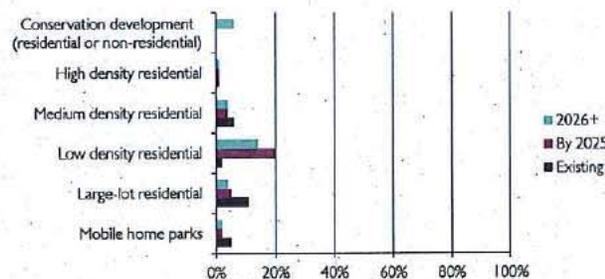

Land Use Mix

## Housing Mix

Most of the housing in the K-32 corridor will be low density or large-lot residential. Most of the density needed to support bus service would come from industry, not housing.

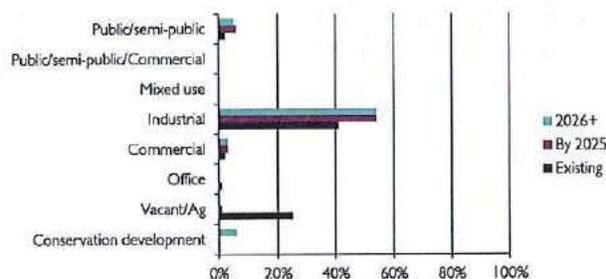

Housing Mix

## Employment Mix

Industrial jobs, including those from green industry will make up over half of the employment opportunities in the K-32 corridor. Less than 1% would come from mixed-use development (public/semi-public/commercial and/or other combination)

Employment Mix

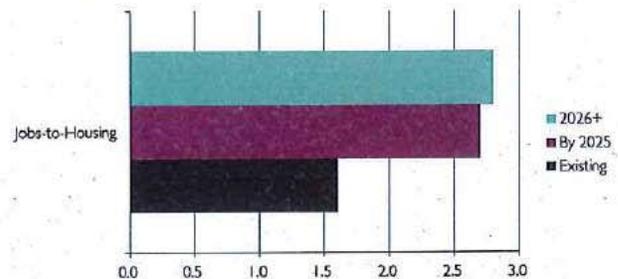

## Jobs-to-Housing Balance

The K-32 corridor will continue developing as an employment center that draws workers from beyond the planning area.

Jobs-to-Housing Balance

(Assumption: X jobs per every 4 households; ideal is 0.75 - 1.5)

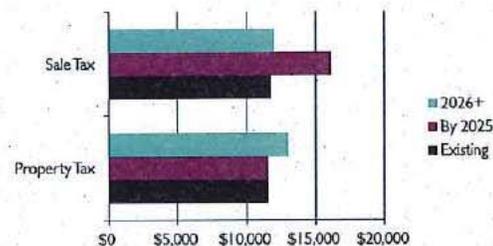

Resource: www.planforsustainabletravel.org

## Tax Revenue Per Acre

Recommended future land use will increase tax revenue in the K-32 corridor. Assuming full build out and an assessed valuation equal to the current rate, non-residential development would be a large contributor to the revenue generated.

Tax Revenue Per Acre

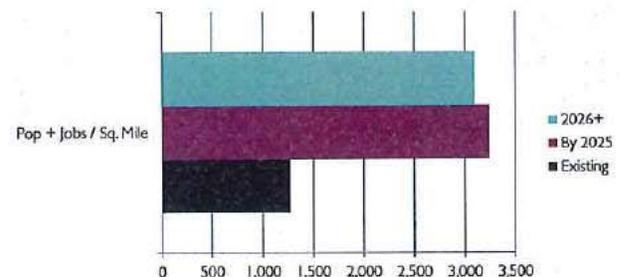

## Transit Densities

If fully built out, land use and development patterns will enable the K-32 corridor to reach the transit density needed to support on-demand bus service by 2025 or thereafter. The corridor's ability to reach density thresholds would largely be due to the number of jobs that recommended industrial land uses may generate.

Corridor Transit Densities

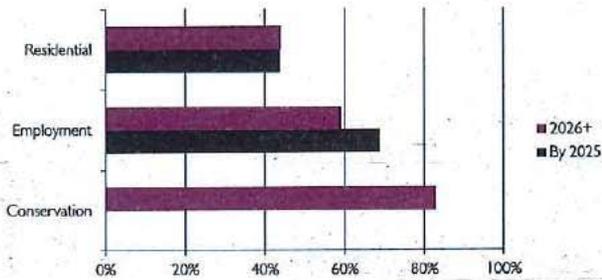

(2,378 needed for on-demand transit service)

## Access to Transportation

Conservation development (residential and non-residential) parcels will have greater access to alternative modes of transportation than standard residential and employment parcels.

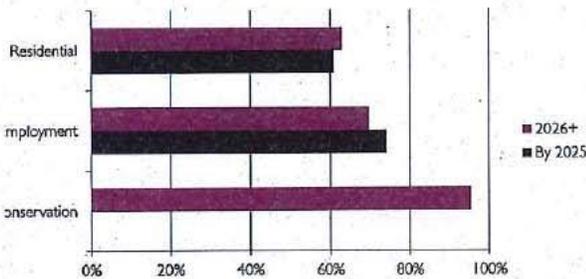

**Corridor Access to Alternative Modes of Transportation**  
(Parcels within 1/8 mile of a transit stop, bike route, or trail)

## Access to Nature

More conservation parcel (residential and non-residential) will have access to parks, open space, and trails in the future than typical residential and employment parcels.

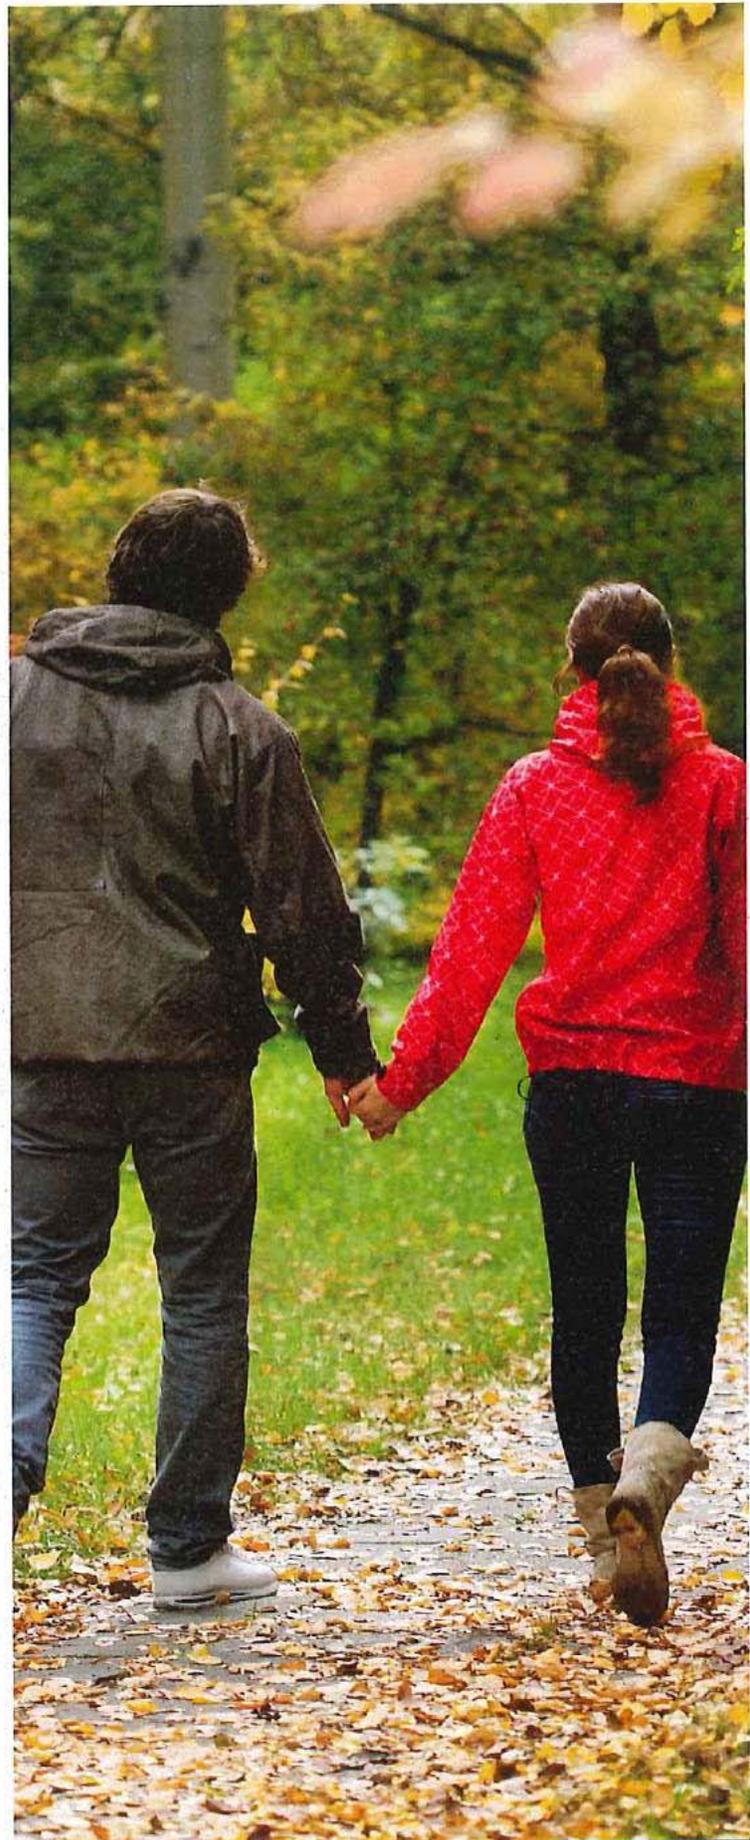

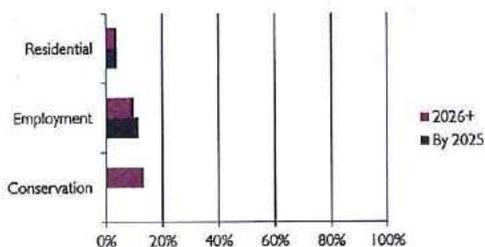

**Corridor Access to Nature**  
(Parcels within 1/8 mile of parks, open space, and trails)

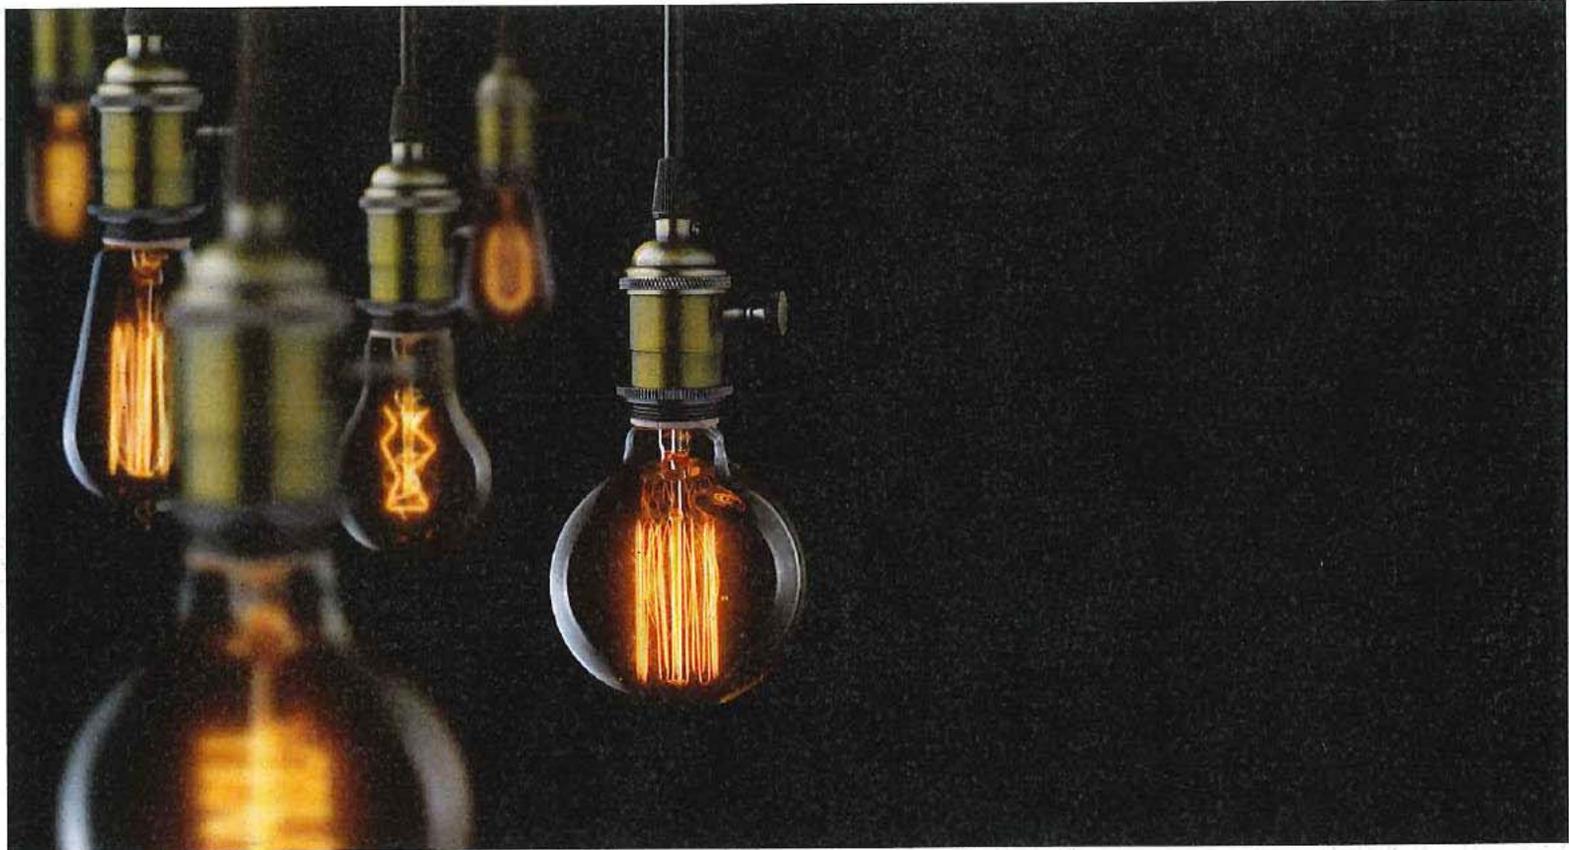

## Flood Protection

In the coming years, fewer residential and employment parcels will be within the floodplain or stream buffer. Conservation developments will help protect natural features. All parcels shall comply with local, State and Federal regulations.

**Corridor Flood Protection**  
(Parcels within 100-year floodplain or 150-foot stream buffer)

THIS PAGE INTENTIONALLY BLANK

## APPENDIX

*The planning team developed detailed summaries of community engagement for each of the four phases of the K-32 planning process. Findings memoranda related to area transit service and a traffic investigation of K-32 at 78th Street were also developed. All such summaries and findings reports are included in this appendix. The final draft of the Railroad Quiet Zone Study is also included.*

# ITEM NO. 4

## PLANNING COMMISSION AGENDA

Tuesday, September 20, 2016 – 7:00 p.m.

**Comprehensive Plan Change: BSCP-25: “WestGate”** a request to amend the Future Land Use Map of the Comprehensive Plan to change the Land Use designation for 37.74 acres from a Mixed Use designation to a Low-Density Residential designation. Requested by Mike Reilly, Triple R Properties, LLC property owners of record. This amendment is to support the request for a planned single-family zoning district to allow for the construction of 128 single-family homes located at 11801 State Avenue.

**Note:** The Applicant has requested a continuance to the September 20, 2016 Planning Commission meeting make changes recommended by the Development Review Team.

<b>PRESENT</b>	Stephan	_____
	Yates	_____
<b>&amp; VOTE:</b>	Neff	_____
	Kasselman	_____
	Parks	_____

**MOTION:** \_\_\_\_\_

**SECOND:** \_\_\_\_\_

**ACTION:** Make a motion to continue this item until the September 20, 2016 Planning Commission meeting.

**STAFF RECOMMENDATION:** Staff recommends a continuance to address the Development Review Teams recommendation.

**NARRATIVE:** A Staff Report is NOT included in the agenda as the applicant requested a continuance.

**PROOF OF PUBLICATION**

**NOTICE**

**NOTICE OF PUBLIC HEARING  
PLANNING COMMISSION  
CITY OF BONNER SPRINGS, KANSAS**

The Planning Commission will hold a public hearing on Tuesday, August 16, 2016 at 7:00 p.m. at City Hall in the Council Chambers, 205 E. 2nd Street, Bonner Springs, Kansas. The purpose of the public hearing is to receive public comment for:

Comprehensive Plan Change: BSCP-25: "WestGate" A request to amend the Future Land Use Map of the Comprehensive Plan to change the Land Use designation for 41.89 acres from a Mixed Use designation to a Low-Density Residential designation.

Requested by Mike Reilly, Triple R Properties, LLC, property owners of record. This amendment is to support the request to change the zoning to allow for the construction of 128 single-family homes as part of a mixed use commercial/residential development located at 11801 State Avenue.

The complete legal description and application for the above items are available for public inspection at the Bonner Springs Planning Department, 205 E. 2nd Street, to Don E. Slone, AICP, CFM, Planning Director at (913) 667-1708 or by email to dslone@bonnersprings.org.

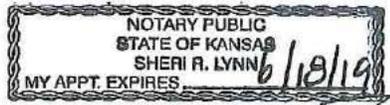

Persons who wish to be heard will be given an opportunity to make comments at the public hearing.

## PLANNING COMMISSION AGENDA

Tuesday, August 16, 2016 – 7:00 p.m.

**Special Use Permit: SUP-136: “CSM Bakery Products Office Facility”**, Requested by Gordon Brest, P.E., Maintenance Manager for CSM Bakery Products, property owners of record. This request is for a Special Use Permit in order to allow the continued placement of a temporary/portable/pre-manufactured office facility. A Special Use Permit was approved by the City on September 23, 2013 under Ordinance No. 2370 for CSM Bakery Products that permitted the existing temporary facility. The property is zoned I-2, Heavy Industrial District and located at 2410 S. Scheidt Lane.

**MOTION:** \_\_\_\_\_

**SECOND:** \_\_\_\_\_

**ACTION:** Make a motion to approve.

**STAFF RECOMMENDATION:** Staff recommends approval of this item with the conditions listed in the Staff Report.

**NARRATIVE:** A Staff Report is included in the agenda. Staff will be present to answer any questions. **This item will be forwarded to the Governing Body on September 12, 2016.**

**SPECIAL USE PERMIT: CSM BAKERY PRODUCTS OFFICE FACILITY****Case No.:** SUP-136**Applicant:** Gordon Brest, Maintenance Manager**Owner:** CSM Bakery Products**Location:** 2410 S. Scheidt Lane**Zoning:** I-2, Heavy Industrial District**Lot Size:** 10.76 acres (Tract C, Wolf Creek Industrial Park) (Parcel No. 221303)**Building:** Existing bakery product manufacturing facility

---

**Exhibits:** Letter of Request of July 12, 2016, Special Use Permit – Site Plan, (2) Current Photos, Ordinance No. 2370, and the Affidavit in Proof of Publication.

---

**Project Description:**

The applicant has submitted a request for a Special Use Permit in order to continue to utilize the temporary/portable/pre-manufactured building as an office facility. A Special Use Permit was approved by the Governing Body on September 23, 2013 under Ordinance No. 2370 for CSM Bakery Products.

**Staff Recommendation:**

Staff recommends approval of SUP-136 for CSM Bakery Products Office Facility for continuance of a temporary/portable/pre-manufactured building to be utilized as an office facility based upon the factors for consideration presented in the staff report and forwarding it to the Governing Body with a recommendation of approval.

Subject to the following conditions:

1. Future expansions or additions to the site not identified on the Special Use Permit Site Plan shall require the submission of a new Site Plan to be reviewed and approved by the Planning Commission;
2. The revocation of the Special Use Permit may occur for a violation of the Zoning Ordinance as provided in Article XXVII of the Zoning Ordinance or violation of any or all of the conditions set out in the Special Use Permit;
3. The Special Use Permit to be valid for a maximum of a three (3) year period of time unless:
  - a. The subject property is sold; or
  - b. The operation of such use by the owner designated in the permit is discontinued for more than 12 months; and
4. The special use permit may not be assigned, conveyed or transferred.

**Factors for Consideration:**

1. **The proposed special use complies with all applicable provisions of these regulations, including intensity of use regulations, yard regulations, and use limitations, unless specifically exempted by the provisions of these regulations** – The proposed use is allowed as a special use in the I-2, Heavy Industrial District and therefore, is an acceptable use under the use limitations thereof. The specific requirements to be considered for a temporary/portable/pre-manufactured building for other than residential, sleeping or overnight accommodations are modified as follows:
  - The request is for a three (3) year period. This request is the maximum time for which a temporary/portable/pre-manufactured building for other than residential, sleeping or overnight may be allowed on site.

2. **The proposed special use at the specified location will contribute to and promote the welfare or convenience of the public** – The existing bakery product manufacturing facility has been in operation since about 1978. There appears to be no benefit to the public that would result in the denial of the special use permit for the temporary office facility.
3. **The proposed special use will not cause substantial injury to the value of other property in the neighborhood in which it is to be located** – The property has been used as a bakery product manufacturing facility since 1978. The addition of a temporary office facility should not cause injury to the value of adjoining properties.
4. **The location and size of the special use, the nature and intensity of the operation involved in or conducted in connection with it, and the location of the site:**
  - a. **The location, nature and height of buildings, structures, walls and fences on the site** – There are no additions to the site being proposed other than what is shown for the location of the temporary office facility. Any future additions to the facility will require submittal and approval of a site plan by the Planning Commission prior to receiving construction permits.
  - b. **The nature and extent of landscaping and screening on the site** – No changes to the landscaping or screening are recommended at this time.
5. **Off-street parking and loading areas will be provided in accordance with the standards set forth in these regulations, and such areas shall be screened from adjoining residential uses and located so as to protect such residential uses from any injurious effect** – The off-street parking and loading areas will not increase from the current facility and the existing off-street parking and loading areas have been repaired as required under the previous permit.
6. **Adequate utility, drainage, and other such necessary facilities have been or will be provided** – All utilities have been provided to the existing bakery product manufacturing facility.
7. **Adequate access roads or entrance drives will be provided and shall be so designed to prevent traffic hazards and to minimize traffic congestion in public streets or alleys** – One access has been provided along the south end of the property along Scheidt Lane.

Subject: Application for a Special Use Permit

Mr. Slone

Attached please find our Application for Special Use Permit for the office trailer currently located on our facility. Our previous Application (Case Number SUP-129) was received by your office on July 3, 2013.

As outlined in our previous letter dated July 3, 2013, we continue to seek capital funds to add offices to our existing facility. Funds for our operations have been limited in recent years and we have been limited to capital expenses with a two year pay back. Offices, unfortunately, do not have a payback.

We have set aside funds for our 2017 capital expense budget to remedy this situation. We have a methodology we hope will be successful in securing these much needed offices.

Until then, we are requesting that our Application be approved.

I am available at your convenience to discuss our situation and future plans. Thank you for your consideration.

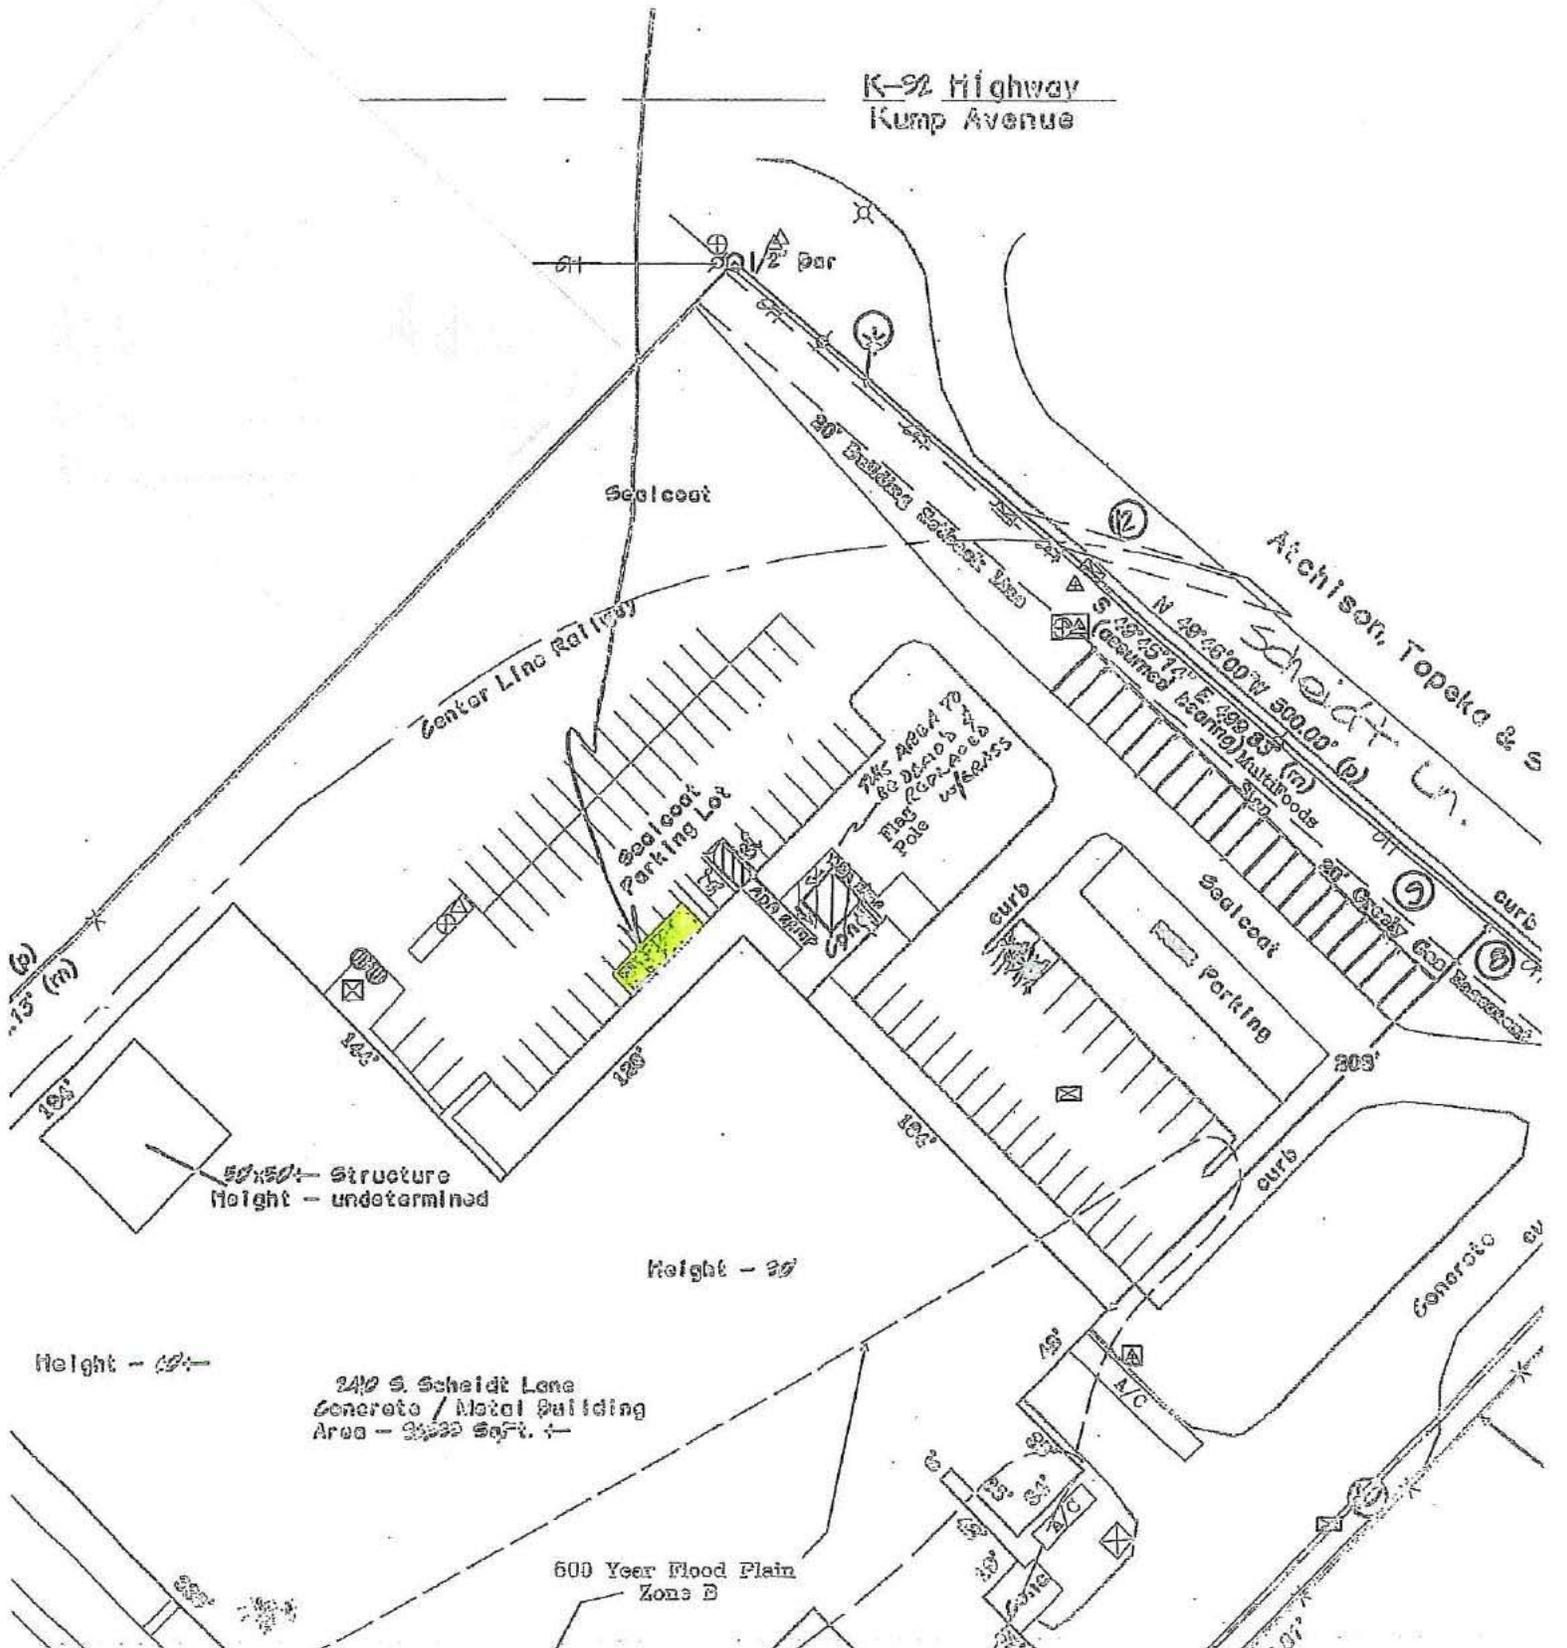

Best regards,

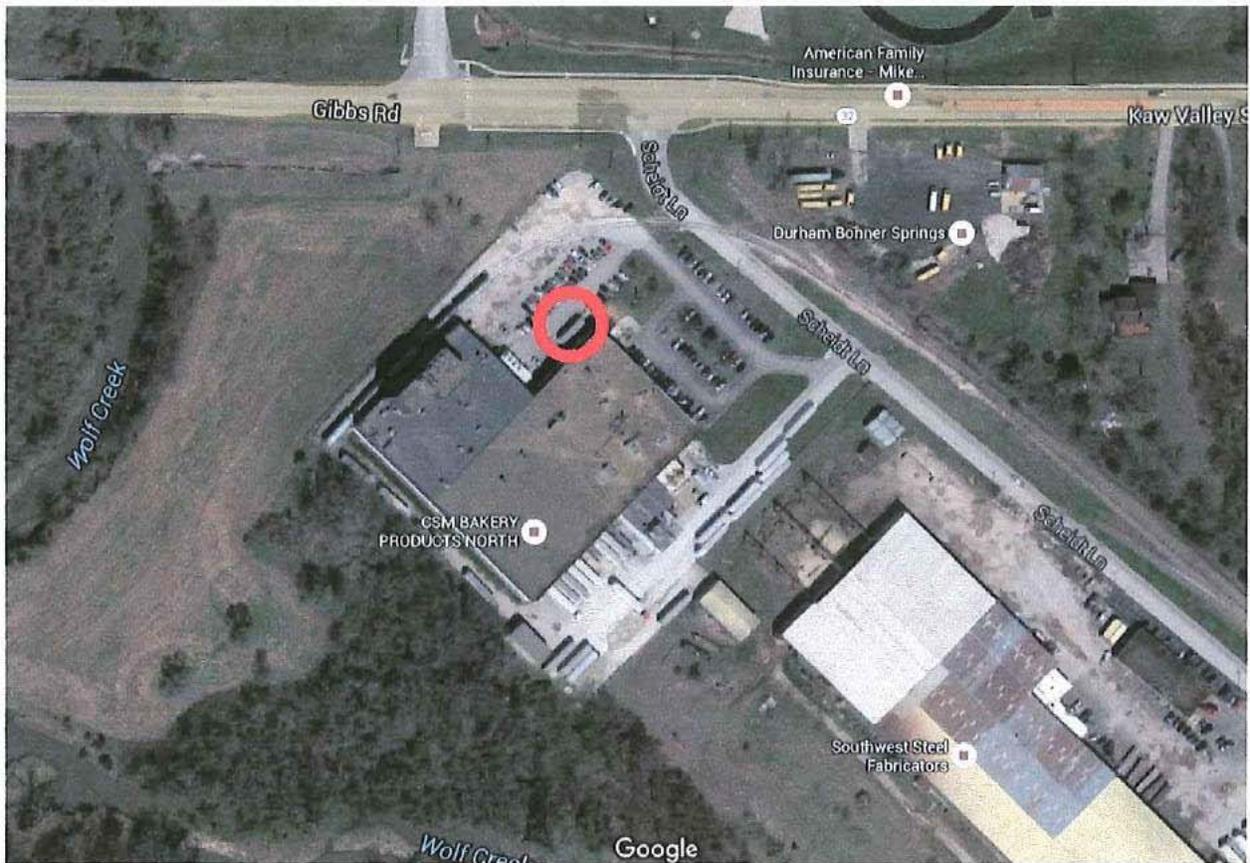

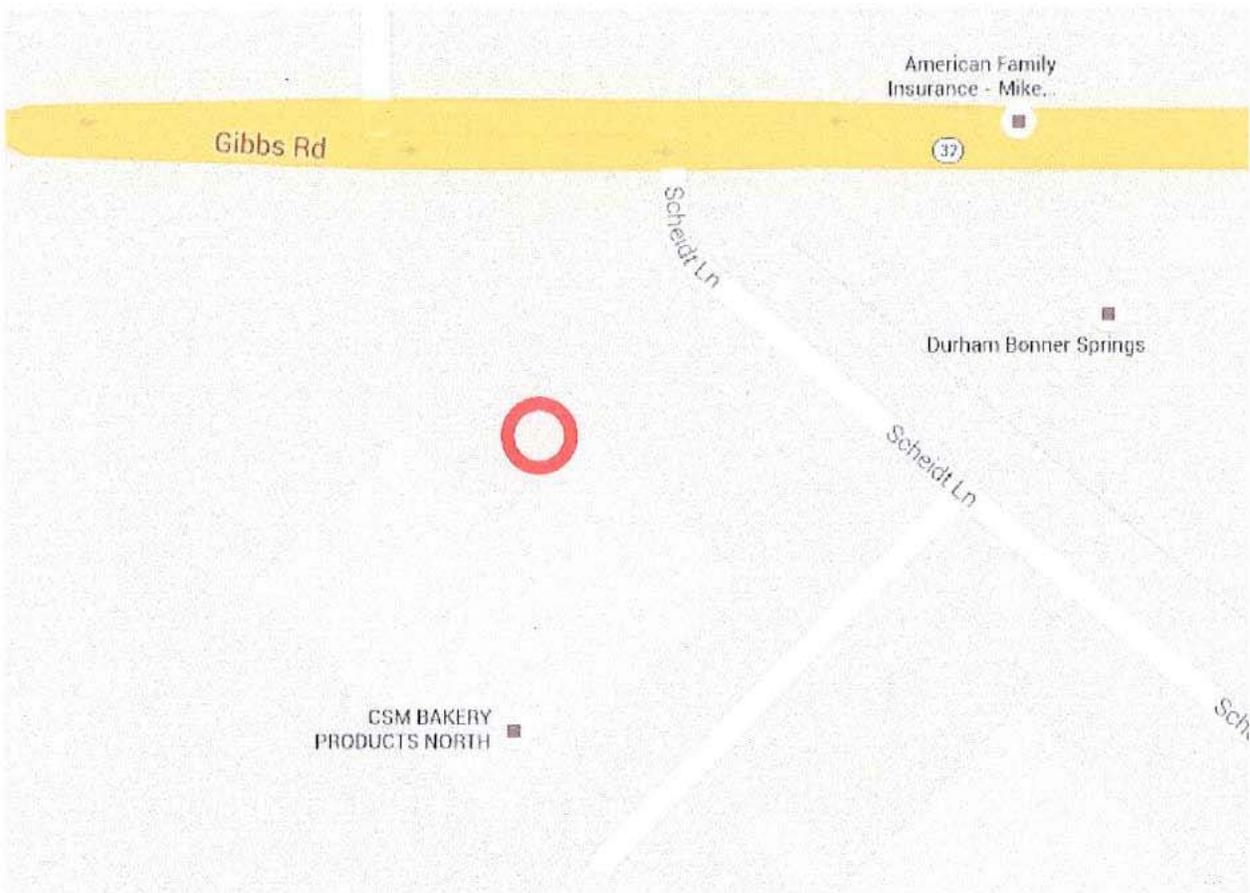

A handwritten signature in black ink, appearing to read "Gordon A. Brest".

Gordon A. Brest, P.E.  
Maintenance Manager

**Temporary Office Facility**

**ORDINANCE NO. 2370**

**An Ordinance to Approve a Special Use Permit for CSM Bakery Products Office Facility SUP-129 to Allow a 10' X 40' Temporary/Portable/Pre-Manufactured Office Facility on Property Zoned I-2, Heavy Industrial District, Located on Tract C, Wolf Creek Industrial Park, also Known as 2410 Scheidt Lane, Bonner Springs, Kansas**

---

**Be it Ordained by the Governing Body of the City of Bonner Springs, Kansas:**

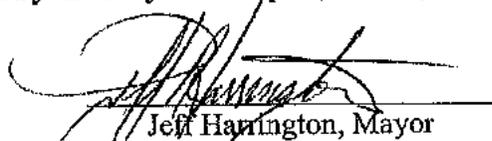

**SECTION I:** That the Official Zoning Map be amended to include a Special Use Permit for "CSM Bakery Products Office Facility" approved as SUP-129 to allow a 10' X 40' Temporary/Portable/Pre-Manufactured Office Facility on property zoned I-2, Heavy Industrial District, located on Tract C, Wolf Creek Industrial Park, also known as 2410 Scheidt Lane, Bonner Springs, Kansas subject to the following conditions:

1. Future expansions or additions to the site not identified on the Special Use Permit Site Plan shall require the submission of a new Site Plan to be reviewed and approved by the Planning Commission;
2. The revocation of the Special Use Permit may occur for a violation of the Zoning Ordinance as provided in Article XXVII of the Zoning Ordinance or violation of any or all of the conditions set out in the Special Use Permit; and
3. The Special Use Permit to be valid for a maximum of a three (3) year period of time unless:
  - a. The subject property is sold, or
  - b. The operation of such use by the owner designated in the permit is discontinued for more than 12 months.
4. The special use permit may not be assigned, conveyed or transferred.

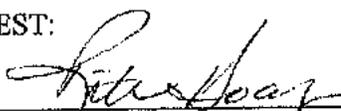

**SECTION II:** Ordinance No. 2287 adopted on September 13, 2010 is hereby repealed;

**SECTION III:** This ordinance shall be in full force and effect from and after its passage and publication in the official city newspaper.

**Approved by the Governing Body and signed by the Mayor on September 23, 2013.**

**PROOF OF PUBLICATION**

**NOTICE**

**NOTICE OF PUBLIC HEARING  
PLANNING COMMISSION  
CITY OF BONNER SPRINGS, KANSAS**

The Planning Commission will hold a public hearing on Tuesday, August 16, 2016 at 7:00 p.m. at City Hall in the Council Chambers, 205 E. 2nd Street, Bonner Springs, Kansas. The purpose of the public hearing is to receive public comment for:

Special Use Permit: SUP-136: "CSM Bakery Products Office Facility", A request for a Special Use Permit in order to allow the continued placement of a temporary/portable/pre-manufactured office facility. A Special Use Permit was approved by the City on September 23, 2013 under Ordinance No. 2370 for CSM Bakery Products that permitted the existing temporary facility for a three (3) year period. The property is platted as Tract C, Wolf Creek Industrial Park and is zoned I-2, Heavy Industrial District. Requested by Gordon Brest, Maintenance Manager for CSM Bakery Products, property owners of record. The property is located at 2410 S. Scheidt Lane.

The complete legal description and application for the above item is available for public inspection at the Bonner Springs Planning Department, 205 E. 2nd Street, to Don E. Slone, AICP, CFM, Planning Director, at (913) 667-1708 or by email to dslone@bonnersprings.org.

Persons who wish to be heard will be given an opportunity to make comments at the public hearing.
